BOARD OF HIGH SCHOOL AND INTERMEDIATE EDUCATION, UNITED PROVINCES.

THE INTERMEDIATE EDUCATION ACT. 1021

UNITED PROVINCES ACT No. II OF 1921.

[PASSED BY THE LOCAL LEGISLATURE OF THE UNITED PROVINCES OF AGRA AND OUDH]

Received the assent of the Governor of the United Provinces of Agra and Oudh on the 30th September, 1921, and of the Governor General on the 10th December, 1921, and was published under section 81 of the Government of India Act on the 1th January, 1922

An Act for the establishment of a Board of High School and Intermediate Education

WHEREAS it is expedient to establish a Board to

It take the place of the Allahabid University in regulating and supervising the system of High School and Intermediate Education in the United Provinces, and to prescribe courses for English Middle classes, subject to the control of the Local Government — It is hereby enacted as follows—

- Short title,
- tion Act, 1921.

 (2) It extends to the territories for the time being administered by the Local Government of the United Provinces.

1. (1) This Act may be called the Intermediate Educa-

(3) It shall come into force on such date as the Local Government may, by nonfication in the Gazette, direct.

2 In this Act, and in all regulations made hereunder, Definitions unless there is anything repregnant in the subject or context.—

- (a) "Board" means the Board of High School and Intermediate Education.
- (b) "Institution" means the whole of an institution, or a part thereof, as the case may be.
- (c) "Minister" means Minister for Education in the United Provinces .

CHAPTER XVI

ELECTION OF MEMBERS OF THE BOARD UNDER CLAUSES (c) AND (e) OF SUB SECTION (1) OF SECTION 3 OF THE ACT.

- An election to fill any vacancy amongst members of the Board which is to be filled by election by Principals of Intermediate Colleges not maintained by Government or hy Head Masters of High Schools not maintained by Gov ernment shall be held on such dates as the Churman shall appoint.
- 2 As soon as the Chairman has fixed the date for election, the Secretary shall circulate a notice to every Principal or Head Master, as the case may be, inviting the nomination of a candidate other than himself for election within the time to be named in the notice. Such time shall be not less than a fortnight from the date of the i-sne of the notice. Such notice shall state the date and hour up to which nominations will be received by the Secretary at his office
- 3. Within the said time any Principal or Head Master, as the case may he, may propose a candidate other than himself for election as a member, provided that such candidate is willing to stand for election. This proposal need not be seconded.
 - 4 On the expiration of the period fixed by the notice, the Secretary shall, after scruting of the nominations received.

prepare and send to every vote a list of candidates who have been duly nominated, and have not withdrawn their candidature together with a voting paper; and shall also specify the date fixed for election and the time on the said date up to which votes must be deposited with him

Provided that if the number of such candidates is equal to the number of vacances all such candidates shall be detented to be elected, and provided further that if the number of such can lidities is less than the number of vacances, all such candidates shall be deemed to be elected, and the Secretary shall matte fresh nominations for the remaining scene; or vacances.

- 5 The voting paper must be signed by the voter and said be placed by him in a ceeled cover superscribed 'voting paper for the election of a member of the Board'. He shall either deliver the cover in person to the Secretary at his office or send it by registered post to him. The voting paper must reach the Secretary before the expiry of the time fixed within which votes will be received. The Secretary shall depost all covers containing voting papers in a safe in his office, until the time fixed by the Chairman for one ning thm and for semiumizing and counting the votes.
- 6 The Churman shall appoint two members of the Board to act with the Sceretary in the scrutiny and counting of the rotes.
- 7 At the time fixed for opening the covers of the voting papers the covers shall be opened by the Secretary, in the presence of the sail members, and the voting papers shall then be duty scrittinized.
- S Every Principal or Head Master, as the case may be of an institution recognized by the Board shall be entitled to vote. Every voter shall have as many votes as there are vacaneered to dedified provided that no voter shall give more 3 and vote to any one candidate. If more than one vote
- These may ed by a voter for the same candidate, such votes
 ecognized as one vote

 If the voter records more

votes than the vacancies, his voting paper shall he declared invalid. The decision of the Secretary and the two members of the Board appointed to act with him shall be final as to the validity of any votes recorded. In case of difference of opinion between them, the decision shall be in accordance with the common of the majority

- 9 After the scrutiny is completed and the votes have been counted, a statement shall be prepared for submission to the Chairman, showing the number of valid votes received by each candidate. Such statement shall be signed by the Secretary and the said two members of the Board
- 10 A candidate who has received the largest number of two or more candidates obtaining an equal number of votes, the election shall be determined by lot to be drawn in the presence of the Secretary and the two members of the Board and such manner as the Secretary may thus fit
- 11 The voting papers shall be pre-erred in the Secretary's office after the election till such time as the Chairman may direct.

CHAPTER XVII.

Miscellaneous.

- Detailed information regarding the examinations of the Board shall be given in the Prospectius of the Examinations, which is issued animally by the Secretary of the Board and can be obtained from the Superintendent, Government Press, Allababad, on payment of the fixed price.
- The rules of the Educational Code of the United Provinces of Agra and Oudh shall apply to all institutions recognized by the Board in so far as they are not inconsistent with these regulations
- The Fourd shall from time to time prepare such forms and registers as may be deemed necessary. The forms when so prepared shall be appended to these regulations and shall,

with such variations as circumstances may require, be used for the respective purposes therein mentioned

The Board shall, for the purposes of a regular course of study prescribe the minimum number of meetings of a class that must be held in preparation for any of its examinations *

including classes AI and XII will be open will be 1+0 for other re ognized institutions the min mum number will be 200 No condidate will be presented for an examination of the Board by

a recogn and institution upless he has been present ; m classes IX and \ia the case of the High School Examination and in classes Mand Min the case of it a Intermediate Examination) f rat least 75 resent of the days the institution was once during two academical years In the case of failed and detained candidates the rescentage will be

entoulated for one academ cut year only The head of a recognized prelitation may condere a deficiency of

not more than are days. All cases in which this Privilege is exercised will

be reported to the Board The Board may, in very special cases condone a d ficier ev of not

prore than 15 days

RULES OF THE EXAMINATIONS' COMMITTEE.

Fules for the scruting of thanks and the checking of the results of failed candidates.

- 1 Any candidate who has failed at an examination conducted by the Board may apply to the Secretary for the scrutiny of his marks and the re-checking of his result.
- 2 Such applications must be made within two months from the date of the publication of the result and must be forwarded by the head of the institution or other authority who forwarded the candidate's original application for permission to appear at the examination
- 3. All such applications must be accompanied by a copy of the Trea-ury chalan showing that the prescribed fee of Rs 10 has been paid. In the case of candidates belonging to Indian States this fee must be sent in cash to the office of the Secretary.
- A candidate shall not be entitled to a refund of the fee unless as a result of the serming he is declared successful in the examination
- 5. If on scratiny and re-checking a failed candidate is found to have passed, his name shell be as once published in the Gazette in a supplementary his. In all other cases the result of the scritiny shall be communicated to the candidate through the head of the institution or other forwarding authority as soon as possible.

Arithmetic — Notation and numeration The four 4 annas The four compound rules in British and Indian money and in Indian weights and measures in common use in the United Provinces Eritish and Metric Systems of measuring length area volumes capacity and weight Factors Prime numbers. G.C.M or H.C.F. by factors I.C.M. Vulgar fractions. Vulgar fractions of concrete quantities. Prictice De imal fractions (excluding the theory of recurring decimals). Decimal fractions of concrete quantities. Square root. Patro. Simple and compound proportion. Proportional parts. Average Decimal approximations (including approximate value of recurring decimals). Contracted methods in the four rules in decimals. Percentages. Profit and loss. Simple and compound interest. Present worth and true discount, Problems (the ne of algebraical equations is allowed in solving problems).

Quadratic equations of statistics Graphical solution of linear simple rules Fractorum Createst common measure Least common multiple Factors Proportions Simple equations of one or more nuknowu quantities with easy problems Graphs of statistics Graphs of straight lines Graphical solution of linear simultaneous equations. Simple graphical problems

B .- Candidates will be provided with equared paper of necessary

3 Geometry—The course includes both practical and theoretical Geometry, and every candidate will be expected to answer questions in both branches of the subject. The questions on Practical Geometry will be set on the con structions contained in the annexed schedule. A together with easy extensions of them. All figures should be drawn accurately for which purpose every candidate should provide himself with a graduated scale, a pair of set quares, a protractor, a compars and a hard penul. The questions on theoretical Geometry will consist of theorems contained in the annexed schedule B, together with easy extensions and deductions with numerical illustrations. Any proof of

n proposition will be accepted which appears to the examiners to form part of a systematic treatment of the subject, the order in which the therems are estated in schedule B is not imposed as the sequence of their treatment. In the proof of the theorems hypothetical constructions will be permitted

N B -Candidates will be provided with equared paper, if necessary

SCHEDULE A

Bisection of angles and of etrught lines Construction of perpendiculars to straight lines

Construction of an angle equal to a given angle

Construction of parallels to a given straight line

Simple cases of the construction from sufficient data of triangles and quadrilaterals

Division of straight lines into a given number of equal parts

Construction of a triangle equal in area to a given

polygon,

Construction of tangents tn a circle and of common tangents to two circles.

Simple cases of the construction of circles from sufficient data

Construction of rectangle equal to a given polygon

Construction of a rectangle on a given base equal in area to given rectangle

Construction of n sequre equal to a given rectangle Construction of n rectangle of given area the sim or difference of whose sides is given. (These constructions should be based on the propositions on the Geometry of the circle?

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines

Construction of regular figures of 3, 4, 6 or 8 sides in or about a given circle,

SCHEDULE B

Ancles at a point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles, and the converse

If two straight lines intersect, the vertically opposite angles are equal

Parallel straight lines

When a straight line cuts two other straight lines, if-

- (1) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal or
- (iii) a pair of interior angles on the same side of the entiting line are together equal to two right angles, then the two straight lines are parallel, and the converse.

Straight lines which are parallel to the same straight line are parallel to one another.

Triangles and rectilineal figures

The sum of the angles of a triangle is equal to two right angles if the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right angles

If two triangles have two sides of the one equal to two sides of the other, each to each and also the angles contained by these sides equal, the triangles are congruent.

If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these sides are equal, and the converse.

If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent. If two right-angled triangles have their hypotenuses equal and one side of the one equal to one side of the other, the triangles are congruent

If two sides of a triangle are nnequal, the greater side has the greater angle opposite to it, and the converse

Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest

The opposite sides and angles of a parallelogram are equal each diagonal bisects the parallelogram and the diagonals bisect one another

If there are three or more parallel straight lines and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that ents them are also equal

Areas.

Paraliclograms on the same or equal bases and of the same altitude are equal in area

Triangles of the same or equal bases and of the same nlittude are equal in area

Equal triangles of the same or equal bases are of the same altitude

Illustrations and explanations of the geometrical theorems corresponding to the following algebraical identities —

k(a+b+c+.)=ka+kb+kc+... $(a+b)^2=a^2+2ab+b^2$ $(a-b)=a^2-2ab+b^2$ $a^2-b^2=(a+b)(a-b)$

The square on a side of a triangle is greater than, equal to, or less than the sum of the squares on the other two sides, according as the angle contained by these sides is obtien, right or acute. The difference in the case of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

Loca

The locus of a point which is equidistant from two fixed points is the perpendicular breeder of the straight line joining the two fixed points

The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which hisect the angles between the two given lines

The entele

A straight line drawn from the centre of a circle to bisect a chord which is not the diameter is at right angles to the chord, conversely the perpendicular to a chord from the centre bisects the chord

There is one circle and one only which passes through three given points not in a straight line

In equal circles (or in the same circle) (i) if two arcs subtend equal angles at the centres, they are equal, (ii) conversely, if two arcs are equal they subtend equal angles at the centres

In equal circles (or in the same circle) (i) if two chords are equal, they cnt off equal arcs, (ii) conversely, if two arcs are equal, the chords of the arcs are equal

Equal chords in a circle are equidistant from the centre, and the converse.

The tangents at any point of a circle and the radius through the point are perpendicular to one another

If two circles touch, the point of the contact lies on the straight line through the centres

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part, of the cucumfacence.

Angles in the same segment of a circle are equal, and if the line joining two points enbtends equal angles at two other points on the same eide of it, the four points have a circle

The angle in a semi circle is a right angle, the angle in a segment greater than a semi circle is less than a right angle and the angle in a segment less than a semi circle is greater than a right angle

The opposite angles of any quadrilateral inscribed in a circle are supplementary, and the converse

If a straight line touch a circle and from the point of contact a chord he drawn the augles which this chord makes with the tangent are equal to the angles in the alternate segments

If two chords of a circle intersect either inside or outside the circle the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other

4 Mensuration —Areas of rectangle circle, triangle and (after measurement) of any rectalineal figure Length of the circumference of a circle

The following books are suggested -

For Algebra-

Ross Elementary Algebra Part I. Longmans Green
& Co

Baker and Bourne Elementary Algebra, Part I G.*Bell & Sons

H S HALL School Algebra Mesers Macmillan

In Geometry-

Hall and Stevens A School Geometry, Parts I-IV. Messre Macmillan & Co

III -HISTORY AND GEOGRAPHY

There will be two papers each of three hours—one in History and the other in Geography

Hestory

Syllabus —Outlines of Indian History from the earliest time to the present day and Outlines of English History from 1485

The following hooks indicate the scope and standard of knowledge required —

Indian History

V A Smith -Oxford Student's History of India Oxford University Press Calculta

Thompson —History of India (Christian Literature . Society Madras)

Har Prasad Shastri History of India (Blackie)

Hornle and Stark A History of India (Orissa Mission Press, Cuttack)

Students' Atlas of Indian History (Macmillan)

English History

J S Lay The English People (Macmillan) Oman Junior History of England (Arnold)

Geography

A -SYLLARDS

Geography — Physical Shape of the earth, rotation and revolution, the seasons, the solar system latitude and longitude, time problems surface of the earth zones volcances, earthquakes, climate, rainfall the monsoons, rivers and their work winds tides and currents

Geography of the world in outline

Geography of the Indian Empire
(b) Books recommended for use are—

A Junior Geography of India Burma and Ceylon by C Morrison T Nelson & Sons London 12 annas

A New Geography of the Indian Empire and Ceylon, by C Morrison T. Kelson & Sons London 2nd edition. Re 1

A Junior Course of Comparative Geography, in one volume and in Parts 1 to 6 separately, P. H. L'Estrange George Phillip & Son, 32 Fleet Street, London, E. C. New edition 1d for each part, and 33 6d for the whole or the complete volume

7

Longmans' Geographical Series for India Book I. The World in Outline with Faller Treatment of India. Longmans, Green & Co. 10 annas

A Geography of India, by G Patterson The Christian Interature Society for India, London, W C Re 1

Murdoch's (J) Manual of Geography, revised and enlarged by G. Patterson. The Christian Literature Society for India Landon W C Re 1

Earth Knowledge, volume 3 McDougall's Educational Company London

The World in Outline, by Mackenzie and Tydeman.

Indian Press. Allahabad Re. 1.

Geography for Schior Classes, by E Maredon Macmillan & Co., Bombay, Rs 2-8-0

Macmillan's Geographical Exercise Book, India, with questions by B. C. Wallie 5d W. and A. K. Johnston's Geographical Exercise Book for Indian Students with questions, by B. C. Wallis. 4 annas.

Map Studies for Schools, India by J E Perkinson K
E J Cooper, Bombay 10 annas

*Books recommended for the use of teachers -

Longmans' Geographical Series for Inlia Book II—The World, with fuller treatment of India New chition revised and enlarged (1911) Longmans Green & Co. Re. 180.

McDougall's Short Commercial Geography of the British Empire, McDougall's Educational Co. London 6d.

IV -VERNACULAR (HINDI, URDU BENGALI ETC).

There will be two papers each of two hours one paper will be set in Prove and Unseen, and the other in Poetry and Composition Grammatical questions will be set in

[•] In connection with the looks recommended for the use of teachers in the properties at should be noted that there are an addition a number of doods approved for the use of recarders generally (with dark books approved for the use of teachers of Angle Vernancials and Vernancials and

both the papers. The ability of the Urdu candilates to read sti a t will be tested by means of a papers t for the purpose.

The following are the text booss pres ribed -

Hindi

- Pam Chart a Managa abritge I by Shyam Sund r Das
- 2 Abhigyan Shakuntala Natak, by Papa La shman Sinha (in prope and verse)
- 8 Sankshipt Hindi Vyasarna compiled by Pandit Kanta Prasad and published by Nagri Pracharni Sabba Benares or Hindi Grammir by Pand t Midho Prasad Pathak

Urda.

 Guldasata t Adab by P Manohar Lal Zutshi (Ind an Press Allahabad)

Tuzuk i Urdu by Muhammad Ismail (Neval Kishore Pre s)

- 2 Sarmaya i Urda by M Ahmad Ashraf Retired Head Manlyi Government High S nool Allahabad
- 3 Qawaid Urdu for High Schools by Mauly: Jamal Uddin Haidar.

For Shikar' the book recommended is-

Inshai Jadid (Majmua-i Kagzi harriwai) Part II by M Asmat Ullah 2nd Manlvi Governmen. High S bool Meeru Lala Kelar Vath, Publisher, Meerut 5 anna°

Bengalı,

S ar Vanabasa by Pandit Ishwar Chandra Vidya agar (Prose)

Tamil Text book (for Gronp C) published by order of the D P I Madras by S P C K Press Vepery Madras

B-Optional Subjects

I -CLASSICAL LANGUAGES

There will be two papers each of three bonrs, the first pap r will be in the prescribed texts and grammar and the second paper in Translation Composition and Unstein

STLLABUS

(a) Sanskrit

Paper I (a) Text books (1) Mitra-labba (Hitopade sha) and (ii) Bhartribari-Nitishataka

Norm—The students should be taught to under tand the passages wheontext and thesubstance and to learn the passphrase se tha synonyms of the words in Sanshut analy is of the compounds. Sandhis and the pro-action of the postry proces.

(b) Grammar—Simple Sandhis Decleration of nouns and pronouns of frequent of currence conjugation of verbs of frequent occurrence bu omitting those of adadi (মহাহি) radhadi (হ্যাহি) jobotyadi (ম্বাহি) and kryadi (ম্বাহি) classes 10 লহ ঠাই, লহু, বিবিলিহু and লহু কাৰু

Books re-ommended in grammar-

- 1 First Book of Sanskrit by Bhandarkar
 - 2 R h Banerjee's Sanskrit grammar
- 3 Sinskrit Prathama Pustaka (মৃত্যুর মধ্যে দুরোন্ত) by Professor Ram Bihari Lol D A. V College Cawnpare
- 4 Uppakramanika (उपम्माखिका) printed by Khadga vilas Press Bankipore
- N.B —Quest one on Grammar exclusively should be asked from the prescribed books as far as possible and should entry about one third of the total marks.

Paper II - Unseen and Translation -

(a) Selected passages from books recommended for rapid reading and from others of equal difficulty for translation into the vernacular of the candidate, (b) sub-tance of easy passages from the abovementioned books to be expressed in English, and (c) translation of easy English prose sentences into Sanskrit.

Book recommended for rapid reading— Kusuma mala (part I) by V. S. Apte Book recommended for composition— Sanskrit Teacher by K. P. Trivedt,

N B -Sanskrit must be written in the Devanagari character

(b) Arabic

Prescribed course—

Majanil Adab, by Louis Cheikho, Vol I, pages 7—28 and 41—1:2 Published by Imprimerie Catholique, Beytout, Syria, sold by the Book Dipôt at Aligarh, or Sallum ul Adab (published by IRa: Sabeb Munibi Gulab Singh, Minfal-i-A'na Press, Labore) Grammar—Mabadini-Arabia المنافق المراجعة والمنافق المنافق الم

Norz .- Arabic words must be written in the Arabic character

* Book recommended for the use of teachers-

Anglo-Arabie Stories, by Maulvi Abdul Bashir Muhammad O-man Ghafii, A S Ahmad-ur-Rabman, 41, Kalta Bazar, Dacca 10 annas.

(c) Perman.

Prescribed course-

(1) Text-

Prose - Gulistan, ميناه and حدال سعدى (excluding

يعديد دلك من وحم العماتيد to من همان إمكار كه تقرب

^{*}In counceton with the books recommended for the use of teachers in this Freegectus, it should be noted that there are in addition a number of books approved for the use of teachers generally (rude list of books approved of tre the use of teachers of angle Vernacular and Vernacular Schools, dated the Sist July, 1916, and its supplements issued aims By)

to آمار داستان دادشایی Anwar Suheili, from و إنالة to على إلى to skil على إلى to skil و balf line).

Ruqaat Alamgiri -(١) وبعة مرين يور حلايب فورد وحصوت اللي

(٢) ربعه مهيوريور حقاصتُ صاوحان . والسالم على ساتنعاليدي

(٣) رفعه مدين بور حالات معم حال رد باش - الدعا

(٣) ونعه فهودد سعادت توام عاليحالا من أصعاف داردد

(٥) رمع فرود عالمحالا ابن مل رباني ميلش كه باشد (١) ومان بدام شاعراده من دوار كشيد راسم

(٧) فيمان بعط أور در حالت دوم البداء (٨) رَفِعة فهريد عَالَيْتِحَاد به أطهار حاسوسان .. راست و

ملكداري كداد

(٩) رفعة - ما كه پال بني حوردم , وإلمدية (١٠) سل شع شاة عاليحاة . عمل باردته إدم

Poetry - Boston the Syllabus for 1921 (excluding 6, 7 and 8) Qasaid Saadi Qasaid beginning with

(١) الباالعاس عبال حالم تن أساس بيست

(١) حوش است عمر و دريعا كه حاوداني بيست

(معدر چر نے ادبان حمانی بیست omit)

(٣) عام دولت درور ر صحوا بحاست

(۲) حو مهد ره رو اُندر راه حق ثانت تدم کود. (۵) حال در آن نهادست و وندگی درناه (۱۵) Grammar—Qawad Far 1 (Resved by M Abdul ty Maulvi دوات فارسي عملي ty Maulvi Ishaq Alı of Allahabad Univer ity (Indian Press, Allahabad)

Rapid Reading -Farsi Jahd, Part II (2nd edition), by Maulyi Suyed Mnhammad Ali Irant Professor, H E H, the

Nizam's Coilege, Hyderabad, Deccan. Students who offer Persian are required to have such a knowledge of the Etymology of the Arabic language as will enable them to explain all Arabic words and phrases—which may occur in the text books and in the books recommended for rapid reading in Persian

NOTE -Persian words must be written in the Persian character

(d) Latin

Two papers will be set as follows — Paper I.—Prescribed prose and poetry

Text books

Pross —Gaesar de Bello Gallico, Books 1 and 2 Poetry — Virgil, Aeneid, Books 2 and 3

Paper II.—Grammar, Composition, and unseen

Faper 11,-Grammar, Composition, and unseen Grammar recommended -Gildersleeve's Latin Gram-

mar

Paper I shall contain passages from the prescribed books together with questions relating to subject matter and language

Paper II shall include (a) questions on grammar, (b) sentences for translation into Latin, (c) an easy continuous passage for translation into Latin, and (d) an unseen passage for translation into English

II -COMMERCE

The examination will consist of two papers — (a) one paper on Business, or Commercial Practice and (b) one paper on either (1) typewriting or (11) book-keeping

Notes -(1) In type writing theory paper of 1t hours' duration (2) Book keeping paper of two and a half hours' duration

The following is the Syllabus in each subject:—

Business or Commercial practice.—Office routine—

Dratting simple business and official letters, preparation of telegrams and cablegrams, including a knowledge of simple codes—Docketing, filing, copying and despatib of letters Ordinary postal regulations, use of postal forms, such as Money Order, V. P. P. Acknowledgment, Registration and Insurance forms. Post Office Savings Fank Accounts Telephone. Simple duplicating and other fabour-aving ampliances.

Meaning of ordinary commercial terms and abbrevia tions Preparation if simple commercial documents and as indents, invoices bills of exchange promisory notes statements of account. Asture and u e of Bills of Lading and railway receipts. Simple banking transactions involving the nature and use of cheques, deposit slips and pass books

Time allowed -21 hours

Typewriting —There will be no practical examination on the typewriter but only a theory paper involving questions on—

- (a) the mechanical construction of the typewriter,
- (b) care of the machine,
- (c, display of matter including headings and titles, centering contractions and abbreviations, hyphonation, punctuation, stened enting, adap ntion of one or more chara-ters to represent characters not given on the keyboard, corrections, erasares

Time allowed-11 hours.

There will also be a secon! paper consisting of type-copying of three manuscripts

Time allowed-1 hour

Book Leping —Elementary theory of double entry book-keeping Preparatina and keeping if the Cash Book, Bonght and Sold Books Returns Books, Bills Receivable and Bills Payible Bioks, Journal and Ledger recording therein simple transactions involving purchases and sales bills receivable and payable real personal and nonminal accounts such as cent salaxies, interact, d. e. counts bad debts, and depretation Drawing up the Trial Balance. Closing the Ledger, and preparing Trading and Profits and Loss accounts, and balance sheet Simple banking transactions involving the nature and use of cheques, Deport

slips and Pass Book, and preparation of Bank Reconcil ation Statements The nature and use of Bills of Exchange and Promissory Notes Petty Cash and Imprest Systems

III - SCIENCE (PHYSICS AND CHEMISTRY)

No candidate shall be admitted to the examination in this subject who has not taken the optional science course in classes VII and VIII.

The examination will consist of two papers one in Physics and one in Chemistry, each of two hours and a half,

(a) SYLLABUS. Definition of Physics and Chemistry— Measurements of length, area, volume, mass and weight, the Ba'ances Density, specific gravity Principle of Archimedes The three states of matter Simple barometer.

Heat —Expansion of solids, liquids and grees, temperature, theimometers, melting and boiling points, conduction, convection, and radiation. Unit of heat, specific heat, change of state, latent heat

Light --Reculineal propagation of light. Reflection, refraction, mirrors, simple leoses, and prisms Position of object and image

Magnetism —Attraction and repulsion, tragnetization, terrestrial magnetism, magnetic meridian. The compass

Electricity - Production by friction Attraction and repulsion. The electroscope, conductors, and insulators.

A simple cell, magnetic and heating effect of a current

Chemistry — Common properties of common substance, solubility, crystallization, distillation. All titues and compounds, elements, and compounds. Metals and non-metals. The stmosphere, combustion, rusting, oxidation. Oxygen and ultregen, water, hydrogen, carbon, carbonic acid, chalk, animal and p and the

Note -The detailed course given below indicates the minimum amount of practical work required to be performed by students and suggests a method of treatment of the syllabus for the guidance of tacchers. They may substitute other experiments of equal educational value Practical work should be co-ordinated with the theoretical work and follow it con eccuively as f r as go able. The grainest experiment should be certormed individually so far as can be arranged.

The u-e of stencils in allowering question papers in science is not allow \mathbf{d}

four years' course in Science

N B -Experiments marked by an astern's in the spliabus for cla, as VII and VIII may be done in class IX if classes VII and VIII are large fact thes for practical work limited or the time tabla in Science restricted to only 3 periods of 3 hour each pre-wise.

FIRST YEAR
(C as VII.)

Subject	Detailed syllabus	Pr , ot exhermen, which		
(Units in B its h system and Metric system to cult tions Measurement of straight lines	1 Find the number of cm in 1 in h.		
Length	Measurement of curved lices Rules for the length of the encumiered a of a circle	2 * Ma ure the err um fe ence and dameter of a cree and so find the value of n		
- 1	Un to in Brills system and Me ri system. Rule for teea of a rectangle calculations	3 B equand paper prove the formula for the area of a restange		
Area .	Use of squared paper to find the ar a of figures other than rectangles. Formin a for the area of a triangle	Be equated paper find the area of a triangle and irregular figure:		
Volume .	Uni sin Brush and Metric system. Rule for the volume of a rectaignfar so il Calculations. The graduated cy inder	5 Cas of graduit d cylinder to find the volume of large solids and the espacety of large verses.		
-	The Eurette	6 Use of bure'tes to find the volumes of small a dls and the capacit's of small but'ses		
Weisht .	Di tinc'ion between mass and we chi Uzita in Liftish' system and Me' r system. The balance	T Simple exercises in wighing, e.g., find the number of 5m in 1 ounce		

Subject	Detailed syllabus	L st of experiments which should be done by the pupil
Density }	Definition	8 Find the density of solids being given rectan gular pie es
1	Calculations	9 • Find the density of common liquids by means of burette
Незѣ	Expansion of solids I quids nd guess by heat Construction of a other mometer Explanation of Centigrade thermo meter	10 Sampl observations with the thermometer e.g. find the bulling points of water and slooho
	SECOND YEA	B
	(Class VIII)
Bubject	Detas ed syllabus	List of experiments which should be done by the pupils
Heat Arta	Compar son of Cent grade and a Fabreone t thermo meters Calculations Formula for the area of a circle Calculations	1 Ohervat on with ther mometer ag, cooling curve for water 2. By means of squared paper or by weighing find the rate of the ares of a
Volume	* Formulae for the volumes of sphere and eylander * Ca culat ons	crele to the area of the square on its radius 3 = By wearhing similar cabes spheres and cylin ders verify the formular for the volumes of cylinder and aphere (The experi ment may also be done hint less accurately by the displacement of water)
Heat	Melting point of ice Me tang point of any so id Conduction of heat Compari on of the conducting powers of common so ids Con yetton of heat Padia	4 Find the melting point of paratin wax or naptha- line
Hydrostatics	t on of heat Relative density (of speci- be grav ty) Frinc ple of Arch medes Determi- nat on of relative den sty by Archimedes Finnoi ple Calculations	Determ nat on by Archime des Principle of the rela tive dens ty of- 5 (a) b des which float in water 6 (b) bodies which enk in

6 (b, bodies which enk in water

Subject	Detail d syllaous	List of experiment, which should be done by the pupils
Chemi try	Definitions and common properties	Mrasurement of relative bardness of different sub stances
	Solubility Influence of temperature on solubility	To find out which of certain substances are so uble in water, e.g., lime salt, morble, in alcohol, e.g., war, salt
	Crystallization Water of crystallization	From solution From mol- ten sulphur
	Mechanical mistures	F itration, separation of cand and salt Separation of aron and sulphor (magnet) Charcoal and natro by so lution and filtration
	Chemical compounds, physical and chemical change	Heating salt, auger and etc., charcoal and nitra from and sulphur from in solution of coppar and phata

THIRD AND FOURTH YEARS.

(Clastes IX and X)

Classes IX and X will have six periods of Science per week—for at least 27 working weeks, this gives a total of 162 periods in class IX.

Subject	Detailed syllabus	Minimum 1 st of experiments which should be done by the pages acdividually		
	Unit of heri Quantity	1 Petermination of specific heat of solids		
Heat	Calculations, Specific heat, Latent heat	2 Lat at heat of fu, on of		
(Latent heat of vagor za-	Latent heat of Vaporization of water		
) _	·		

Subje t	Defuled sy labus	Minimum 1 st of experiments which should be done by the papels and vidually
Chemistry	Effect of described sub- atinces on boiling point Distillation Pressection of water	To had b P of solutions of cal lam chloride Solu t on of differing stron, the To find tubes hore corks, set up apparatus for dist lia tion and find B P before and after distillation
į	Elements and compounds Met is and non metals	To examine the elements sulphir copper leid Mer cury, size To examine the compounds forfous sulphir copper sulphir lead axilo mercury axido and regain the elements
	The atmosphere Combustern active air	Burning a caudle in a belt jar Repeat with anlphar phosphorus To m asure the proportion of air used up when a substance burns in air
1	Rosling .	To how iton will not rust indip s r To measure the air usel up when iron rusts in air
	Increa can massan ru tang and burning Explanation of above In the Inction of terms Oxygen and hatro gen	To show increase in mas when magnesium and iron when may a rand when iron rus s in air—when a candle burns in sir
	Ozygen	Preparation from mercurio ox de sud possas um chlo rato in small quant t es and on large scale from mana, naces diox de and potes um chorate ats progerties. To show 15 s in mais when pelassom chlorate, 35
	Mets a and n n metals Caids	h=1cd. Their tasse and seeded proprie

Subject	Detayied syllabue.		Minimum list of experiments which s suld be done by the pupils individually		
Light	Redection of hight by plan mirrors Laws of reflection Images Redection of light by con- care spherical mirrors spherical mirrors spherical mirrors and the spherical mirrors image. Reflection of light Laws of refract to Reflective under priving, path of a rejor light Laws of refract to Reflective under priving, path of a rejor light Laws of refract to Reflective under priving, path of a rejor light converted to the convex lens. Position of object and jumige	2 3 4	Verification of the "Angle" law of refice then at plane through the feed length of the perification of high training the feed length of the law of refraction of hight Traung the part of ray of hight through a prism Pecal length of Jans		
Magnetum	Magnetic attraction and repulsion Magnetization and demagnetization The sixth as magnet Magnetic mend an The compass	7 7 8 1	Verification of the law of magnetic attraction and repulsion Making a magnet Demognetising a magnet, Marking a N S line		
Frictional electricity	Production of e'estricity by friction Electrical sitraction and repulsion Two kinds of electrification The electroccope Conductors and insulators	12	Electrification of rods of glass, ebonic etc Vernfaction of laws of attraction and repulsion Gharging an electroscope Finding by mean of the electroscope whe thor bodies conduct or manufact		
Ourrent eles /	A simple cell Magnetic effect of a cur rent Electrical bell, electric lamp Very simple explanation of	14 15	Making a simple cell Finding by experiment the magnetic effect of a current on a magnetic needle		

Note —In class X time is left for raying the whole course in preparation for the Righ School Examination

(b) Books recummended for use in Chemistry-

Chemistry for Indian Schools for Standards IX and X by E. G. Hill. Professor of Chemistry, Mnir Central College Allababad. Indian Press Allababad. Re. 1

Physics and Chemistry for Secondary Schools in India, Parts III and IV in one volume by E G Hill and A H Mackenzie Micmillan (Co 1918 Re, 18-0

* Books recommended for the use of teachers-

Practical Chemistry volumes 1 and 2, for Standard VII of High Schools in the Bombay Presidency by H. E. H. Pratt bay bay

The following hooks in Physics are recommended for teachers reference library —

A Class book of Physics by R A Gregory and H E Hadley Macmillan & Co Lessons in Science by R. A Gregory and A T Simmons Macmillan & Co Re 1-8-0

A Course of Physics by C H Draper Popular and Natural Philosophy by Ganot

IV - AGRICULTURE (AGRICULTURAL BOTANY)

The examination will consist of two papers of three hours each and a practical test. The first paper will be on the subject matter in the syllabus up to and including sub-section o—Soil, and the second paper on the remaining portion

- 1 TYPICAL PLANT MUSTARD OF BEAN Students should be supplied with entire plants dug up and the roots freed from soil by washing
 - A The root arrangement of branches, origin of rootlets, root bairs root cap, the woody centre

^{*} In connection with the books recommended for the use of teacher; in this Properties is thought be noted that there are in addition a number of books approved for the use of teachers generally (vide his of books approved for the use of teachers of Angle-Vernacular and Vernacular Schooks, dated the SLs July 1916, and at supplements issued annually).

- B—The shoot cylindrical stem, nodes and internodes, npex and bnd, appendages of two kinds, origin of appendages, woody centre as shown in the cross section
- C The flower the parts, successive appearance in the inflorescence
- D The fruit development from the pistil, ripening accompanied by withering of the plant
- 2 THE SEED PEAN-
 - A -- Position in, and attachment to, the walls of the ,
 - B -Parts of the seed dissected out
 - C -Comparison with the seed of the goard
- 3 THE SEED and GERMINATION-
 - A -Conditions necessary for germination -
 - Water—Absorption, by dead and live seeds, absorption from water, most earth damp air, amount of absorption, method of absorption
 - (2) Air and oxygen—necessity of air, method of entry into embryo
 - (3) Heat—comparison of germination at differ ent seasons
 - (4) Light-not necessary for germination
 - B.—Respiration of germinating seeds absorption of oxygen, evolution of carbon dioxide, loss of weight
 - C -Heat produced by germination.
 - D Food material stored on the seed starch sugar, gluten oil, digestion of these and the absorption by the embryo, sufficiency of these for the support of the embryo during germination only
 - E Emergence of the seedling difference in behavionr of the cotyledons

- 4 Roots and their spork -
 - A -Tap and the true root-adventitious roots, entings and layers
 - B Direction of growth tap secondary, and tertiary roots, influence of moistage
 - C -Functions of the root -
 - (1) Absorption of water, root pressure
 - (2) Absorption of soluble matter from the soil
 - (3) Fixation of the plant
- 5 Soil —What is soil 9 Different Linds of soil, recognition of different Linds of soils in the field and from samples in the class-room, formation of soils, weathering, local and transported soils (To illustrate the transportation of soils the pupils should be made familiar with the formation of the soils of the Gangetic plain) Effect of tillage
- 6 Water an soil. Capillary movement of water in soils, conservation of moisture, loss by evaporation, behaviour of different soils in relation to water, relations of the ordinary operations of cultivation in the conservation of moisture, effect of tillage upon the conservation of moisture and on the supply of plant food, other methods to be followed for the conservation of moisture in soils, wells, percolation and spring, the principles underlying their construction, different water requirements in the various crops, local methods of irrigation, downward movement of water dramage
- 7 Raunfall.—Raunfall of the United Provinces, its distribution as affecting the system of cropping
 - 8° Leaves and their work -
 - A -Structure of the leaf-
 - (1) Parts of the leaf
 - (2) Shapes, simple and compound
 - (3) Veins connected through mid rib and petiole with the wood of the stem.

- B-Function of the leaf-
 - (1) Formation of starch in presence of light.
 - (2) Absorption of cathon dioxide
 - (3) Re absorption of starch
 - (4) Respiration carbon dioxide evolved.
 - (5) Transpiration
- C -Successive appearance of leaves, leaf fall
- 9 Stems and their work A — Forms of steme—length of internode erect, climbing, and underground stems
 - B Structure of stems-radial or scattered bundles, secondary thickening annual lings, bark
 - C Elongation of stems-apical growth , buds
 - D -Branching of stems-position of the laterial buds
 - E-Function of stems-prrangement of leaves,
 passage of food material and water
- 10 Flowers and their work -
 - A Essential and non essential organs
 - B -Pollmat on
 - C Self and cross tertilization, monoceism, dieceism, transport of pollen
 - D -Function of the non escential organs
 - E -Growth of the ovule
- 11 Fruits and seeds -
 - A Ripening of the frmit
 - B The commoner forms of fruit
 - C The commoner forms of seeds
 - D -Dispersal
- 12 Types of plant
 - A -Free, living saprophytic and parasitic plants
 - B -Lower forms of plants -
 - (1) Alga spyrogyra
 - (2) Fungus monld
 - (3) Fern

13 Interdependence of plants and their surroundings as illustrated by the local crops and the climate of the district.

Note.—Gandidates will undergo a course of practical work in connection with the above syllabus.

Note for the guidance of teachers in the carr ing out of the practical work in connection with the syllabus in Agricultural Botany.

All specimens required for demonstration purposes should be obtained before each lesson period, so that the pupil's time is always properly ntilized during each lesson.

A special note-book should be kept by each pupil for practical work, neat sketches should be made and concise descriptions entered therein. These note-books must be kept properly up to date and realy for inspection by the Inspector or Examiner.

As a general rule, the pupils are to be supplied with individual specimens for personal examination and description. This particularly applies to paragraphs 1 and 2 (vide syllabus)

Caver's Plant Biology published by Messrs W. B. Clive, University Tutorial Press, 25, High Street, New Oxford Street, London, W. C., is recommended for the teacher only, and the numbers attached to the experiments detailed below which are to be performed by the pupils, refer to the number of the experiments given in that book.

3A. -(1) Vide syllabus, experiments 20, 22, 28-30, 40, 43, 50.

(n) Vide syllabus, experiments 54, 77, 79.
(iii) , , , 96, 97

3E.—Compare emergence of broad bean, desi sem, and castor (or cotton) p'ant. 4B .- Experiment 165-167, 169-172.

4C-(1) Experiments 203, 205 For demonstration only 206-208

(ii) Experiments , For demonstration only 210.

8A -- (111) Experiments 224, 225, 226, 227,

8B.— (1) , 230, 232, 234

(11) 248, 250, 251, (111) 241.

(1v) , 276, 277.

(v) " 278, 284.

Throughout, and especially in such sections as no 11, the tercher should only explain examples of common plants growing wild or cultivated in the neighbourhood of the school.

When section 4C is reached, lessons in section 5 should be started One-half of the lessons in each week to be devoted to sections 5, 6, and 7, until that portion of the syllabus which deals with certain elementary principles of agriculture is complicted, while lessons on sections 8, 9, etc., are to follow immediately on the completion of 4C.

The following is the list of apparatus, etc., showing the minimum requirements for the above syllabus.

Norm —This list has been prepared for a class of twelve students working together. If more students have to work at the same time the number of articles to be u-ed by each student should be increased proportionately.

If there be a doubt as to the name of any article, Messrs Baird and Tatlock's catalogue for 1906 should be consulted -

Name article	Quantity	Number in Baird and Tatlock a catalogue
Chomical balances with gramme weights Backery General (ACO a) And (ASO a) Aspirators 2 littee or bugger (2 without tubuleres) (2 with 1 tubulere) (2 with 2 tubuleres)	2 #davar . 2 " . {	120 203 1108 1004 1005 1012

V - DPAWING

The examination will consist of three papers of two hours such

SYLLABUS,

Freel and Drawing from the flat - To copy to an enlarged or reduced scale

Model Drawing - Drawing of common objects or from casts shaded and the following geometrical solids --

Cubes prisms, cylinders comes both right and oblique right and oblique sections of these solids wedge sphere

Geometrical Drawing —(I) The theory and use of instruments especially of the protractor and Marquoise scale

- 2) Plain block letter writing
- (3) The whole of practical plane geometry
- (4) Drawing to scale viz, scale of chords diagonal

VI - MANUAL TRAINING

The examination will consist of one paper of three hours in Drawing and a practical examination of four hours in Woodwork

- (a) Stllabus
- (1) Woodwork-
- (a) A series of model* graduated in respect of the tool manipulations involved to be made in wood from working drawings (drawn in plan elevation, side tiew and conventional isometric projection) or from a given pattern in wood, the construction of the models to involve the use of one or more of the following tools Jack plane Try Square, Marking Gauge Marking Knife, Smoothing Plane Tenn Saw, Everl, Serew Driver Firmer Chieel, Hammer, Mallete, Bradawl Nail Punch, Compas, Firmer Gonge, Gimlet, Frame Saw, Lpoke Shave, Brave and Bit, File

The following joints at least should be included amongst the models -

Half lap, Housing, Mortice and Tenon, Half lap Dovetail Box Dovetail, Edge Dovetail, Bridle

> b) The care and maintenance in good working condition of the above-mentioned tools, excluding the setting and sharpening of the saw

(2) Drawing-

Drawing in plan, elevation and side view of all models, in the course and in conventional isometric projection of tho e of a rectangular shape

Note 1—A scheme drawn up on the above lines as given below Teachers seed not keep sincely to the particular model mentioned in this scheme, but if any changes in the modes are made these should not invo we changes in the new loot insimplations employed. The course "Abouth, if you life, be commenced in class 'VIII.

Note 2 -Attention is invited to suggestion a for teaching of Manual Tree ing contained in Tourist De ction a circular no 2 of * (b) Books recommended for the use of teachers Tue Teacher's Handbook of Seojd, by O Salloman.

VII -- A MODERN EUROPEAN LANGUAGE French

There will be two papers of three hours each The first paper will consist of Selections from the prescribed Texts and Grammatical questions thereon. The second paper will consist of Unseen Translation and Composition.

Books prescribed-

Ed About -Le Roi des Montagners Macmillan's edition

Macmillan's edition (Siepman's

Du Camp -La Dette de Jeu (Cambridge Uni versity Press)

Perrault -Contes de Fees Edited by Fasnacht
(Macmillan)

Grammar recommended-

French Grammar (Sonnenschein's Parallel Grammar Series)

NOTE.—Viva Voce Examination has been dropped for the present.

VIII -DOMESTIC SCIENCE

The examination will consist of two papers. The first er will contain questions on Physiology, Hygiene HonseManagement Home Nursing The second will consist practical examination in sewing to be held at the time as the examination in written work. There will a e an oral test in First Ad and Home Nursing

+ a Syllabus

a basis for the teaching of Hygiene and Homety there should be a preliminary simple treatment of

a numan skeleton, the organs of digestion, the circula-- I the blood, the nervous system, respiration

1.—Hygren•

Great importance should be attached to practical work wherever the admits of this gir - Composition of air, ventilation, importance of

air, impurities of air, diseases caused by impure air,

Water - Composition of water, quantity of water required, source of water supply-springs, deep wells, surface wells, rivers, tanks, how water is polluted, how to prevent pollution of water, how to purify water, boiling and filtering

Food - Composition of food, composition of good diet and its importance, preservation of food, cooking of food, drinks and condiments

Personal Hygien. - Cleanliness of body (hair, nails, teeth, etc.), clothing exercise, importance of temperance, the use of pan, opium, and other drugs, spitting

Precautions against discases—Infectious diseases, small pox measles, and diphtheris, etc.), subcreulosis, enterio fever, dysentery and diarrhoea, cholera, sich, leprosy

2 -First and

Roller bandage, figure of eight as applied to-knoe, elbow finger, ear, bandage for eye, nose chin, many tailed bandage for chest. Bleeding of different kinds, how to stop bleeding, drowning, burns, sealds, jruises, aprains, proken bones, dislocation, carrying injured people, faunus, aunstroke, hysteria, epilepsy, sufforation, foreign bodies in eye ear, nose and threat, bites of mad dogs, signs of maddess in dogs, sawke bites, sturge

3 -- Home-Nursing

Noze -None of the work is to be purely theoretical Practice must be given in every point which slloss of practical work

Room -Bed, bedding, furniture, light, warmth, ventilation

Nurse -Health , dress , duties and qualifications of a

Infectious allness — Precautions during illness, disinfection of room, clothing, and bedding after illness, use of disinfectants

 $\label{eq:contralescence} \textit{Convalescence} - \textit{Occupations}, \, \textit{visitors}, \, \textit{rest}, \, \textit{sleep} \, \, \textit{and} \, \, \\ \textit{food} \, \,$

4 - Care and Training of Children.

Food, sleep, exercise, play, clothing, cleanliness, surroundings

horn—As an indecation of the acope and standard of instruction in Hygiene and Heine Notining, leachers are referred to sections II, III, and IV of Personal and Domestie Hygiene for the School and Home, by Mirs Heroid Hendlay (Riss Sahb M Gulab Singh & Sons, Calentia), also to Indain Manut of First Aul and Indain Home Nursury, published by the Ind an Connell of the St John Ambulance Association (Thacker, Spink & Co, Calentia)

5 .- Household Management.

A -Choice of House. Furniture and Decoration Distribution of rooms Gleaning and care of house and furmiture Disposal of refuse and sewage.

B - Care of the Litchen

Preparation of simple food

Two of the following groups -

- (i) preparation of rots, rice, dol, and tarkars,
- (11) preparation and care of milk,
- (115) preparation and care of meat. (One dish only required)
- C Duties of mistress of bonsehold.

Proper distribution of daily activities. Accounts and budgetting of expenditure.

6.—Seuing and cutting-out,

Sewing—Each candidate should select three of the following groups: A good standard of scall will be required in the various stitches required in making up garments and in mending worn articles of clothing.—

(a) To cut and make coat (nchlan) or pyjama or shirt (kurfa) or a waisteoat for a mau.

- (b) To ent out and make up a kurit or blouse or skirt or petticent or pyjama for a woman
- (c) To cut out and make up frock or bonnet or pyjama or bands for child.
- (d) Drawn thread or crewel work or English embroidery or cirkan work or sulme siture
- (e) Knitting of stockings

IX -FURTHER COURSE IN MATHEMATICS INCLUDING MECHANICS AND TRIGONOMETRY

Ordinarily only those boys who have taken Science in classes VII and VIII should be admitted to the course

The examination will consist of two papers of three hours each and a practical examination

A -SYLLABUS

- 1 Algebra —Remainder theorem Factors Quadra tic equations Simultaneous equations H C F and L C M Fractions Elementary propositions in ratio and proportion Arithmetic and geometric progressions Elementary theory of Indices Elementary properties of surds Graphs of ample functions
- 2 Trigonometry (a) Theory Measurement of angles
 Trigonometrical ratios and the relations between them
 Use of the table of logarithms and of the trigonometrical
 ratios Trigonometrical transformation Multiple and
 sub multiple angles Simple trigonometric identities and
 equations Solution of transfels
- (b) Practical Batios of an angle by measurement Area of an irregular field Height of an inaccessible point Distance from an observer of an inaccessible point Distance between two inaccessible points in a horizontal plane
- 3 Mechanics (a) Theory Definition of force Re presentation of forces Equilibrium of a body under three forces Momants Polygon of forces Priction Centre of gravity Simple machines Practical mechanical advantage velocity, ratio and efficiency

Displacement, velocity and acceleration, composition of these Elementary dynamics of rectilineal motion. Definition of momentum. Newton's Laws of Motion.

(b) Practical—Extension of a spring Moments Levers for parallel forces. Verification of triangle and parallelogram of forces.

Friction Centre of gravity Determination of practical mechanical advantage and efficiency in the case of simple machines

Norm.—Alonggested distribution of the work over classes IX and χ is given below for the guidance of teachers

Suggested detailed class syllabus

CLASS 1X

Algebra - Remainder theorem by actual division

Factors Quadratic equations, Simultaneous equations of first degree in x and y H C.F and L.C M by factors only. Easy fractions Elementary propositions in ratio and proportion Arithmetic and geometric progressions Elementary theory of indices

Trigonometry Theory—Measurement of angles. Tri gonometrical ratios and the relations between them. Determination of the other trigonometrical ratios when the value of one is given U-e of the table of logarithms and of the trigonometrical ratios

Solution of the right angled triangle -

The following general formulae -

$$\frac{\sin A}{a} = \frac{\sin B}{b} = \frac{\sin C}{c}$$

$$a^3 = b^2 + c^2 - 2bc \cos A$$

$$a = b \cos C + c \cos B$$

$$\tan B = \frac{b \sin C}{a - b \cos C}$$

Solution of triangles in the following cases -

(1) One side and two angles given

- (11) Three sides given
- (iii) Two sides and contained angle given using above formulae
- Trigonometry Practical—(i) Construct right angled triangles, calculate by measurement the ratios of one angle and compare their values with those given in the tables
 - (ii) By means of a base line and perpendicular off-sets, find the area of an irregular field
 - (iii) Find the height of top of a hill tower or of a stationary balloon by taking the elevations at two points in line with its projection on the earth's surface graphically and by calculation
 - (iv) Find the distance of an inaccessible point O from an observer at A by taking the readings L BAG L ABG and AB graphically and by calculation

Mechanics Theory - Definition of force, representation of forces Equilibrium of a body under three forces, concurrent and parallel

Displacement velocity, and acceleration composition of these Formulae —

v=u+ft, s=nt+ 1 ft2, v2=u2+2fs

Definition of momentum Newton's Laws of Motion

Mechanics Practical -- Extension of a spring Levers
for parallel forces Verification of triangle and parallelogram of forces

CLASS X

Algebra —Remainder theorem (general proof) Factors Fractions Elementary properties of surds Theory of quadratic equations Simultaneous equations Graphs of simple functions including circle and rectangular hyperbola.

Trigonometry Theory—Projections, proof of sin $(A\pm B)$ cos $(A\pm B)$ geometrically by use of projections, hence $\tan{(A\pm B)}$, $\sin{P}\pm \sin{Q}\cos{P}\pm \cos{Q}$ Minitiple

and sub multiple angles Simple trigonometric identities and equations. Formulae connecting sides and angles of r triangle. Solution of triangles, including the ambiguous case

Trigonometry: Practical—(1) As in exercise (iii) of class IX, when the ground slopes up or down

 Determinat on of distance between two inaccessihile points in a horizontal plane, e.g., distance between two trees on imposite sides of a river.

Mechanics Theory—Moment of a force Moment of resultant Polygon of forces Angle and co-efficient of friction Centre of gravity in emple cases Simple machines, inclined plane, system of pulleys wheel and nxle Frictical mechanical advantage, velocity, rain, and efficiency

Mechanics, Practical - Experiments about moments, e.g., forces on a body which can far about an axis. Practical determination of centre of gravity. To determine the co-efficient of friction on an inclined plane, (a) by arranging the angle of slope so that the body is on the point of moving down, (b) by ob evening the forces necessary when the body is on the point of moving up and alipping down the plane respectively. De ermination of the practical mechanical advantage and efficiency in the case of (a) simple pulley, (b) pulley, (c) wheel and axie

(b) The books recommended for nee are-

Algebra - Same as for ordinary Mathematics

Trigonometry - Elementary Trigonometry, by W. E. Paterson, Clarendon Press, Oxford 3s.

Mechanics.—Briggs and Bryan's Matriculation Mechanics, University Tutorial Press, London 3s 6d

The following books are recommended for teacher's reference library -

 frigonometry for beginners, hy J. B. Look and J. M. Chi'd, Macmillan and Co. 3s.

- Logarithmic and other tables for schools, by Frank Castle. Macmillan and Co. 8d.
- 3 Mechanics, parts I and II, Dynamics, and Statics by R T. Glazebrook, Cambridge University Press 58
- 4 Mechanics for Beginners treated experimentally, by L Cumming Revengton, Perceval and Co. 3s.

Exercises in Mathematics, D. B Mair Macmillan and Co 5s

A School Course of Mathematics, D. Mair Clarendon Press, Oxford 3s 6d

The following apparatus has been approved for the teach ing of Further Mathematics to the High School classes. It can be seen in the Teachers' Training College at Allahabad and it is so simple that it can be made locally —

- 1 Wooden stand with brass kuife edge.
- 1 Drawing Board with brass socket.
- 3 Clamp pulleys
- 2 Moveable pulleys
- 5 Tin slides.
- 2 Pane
- 1 Steel spring.
- 1 Friction block
- 1 Inclined plane with support and clamp
- I Tin roller
- 3 Tin weights
- 2 Hooks and string
- 2 Half-metre scales
- 1 Iron axle
- 1 Sighting rule
- 1 Cross-head and pole.
 1 Ontical square.
- 1 Quiteat spuare.
- 1 Wooden tripod (With brass thumb serew.)
- 1 Trigonometer with brass scale.
- 1 . wooden scale.

INTERMEDIATE EXAMINATION OF 1925

There will be one paper on the prescribed prose course and a second paper will be set on the poetry course, and in each paper one question will be set on 'Unseen' passages

In place of the Unseen Prose passages candidates who offer English as their mother tongine will be required to answer questions on supplementary prescribed texts

A third paper will include (a) translation from a vernacular into English, and (b) a narrative or descriptive piece of composition in English. In the case of candidates who offer English as their mother tongue, the third paper will consist of an Essay together with questions on English composition and on the bistory of English literature from 1500, as in Hudson's outline History of English Literature (Bell and Co)

Norm —I. In the case of books presented for de'alled study egicilates will be expected to show a cose familiantly with the text, including meaning of wolfs, construction of sentences historical and other silu sions, as well as knowledge and understanding of the subject matter. They should be able to indicate contexts and to paraphraya and explain any difficult parages in sample and correct Englath.

2 In the case of books prescribed for general study data hid knowledge of the text will not be required, but candidates will be expected to show that they have real the course with intelligence and with some appreciation.

Books prescribed -

Prose -(a) For detailed study-

Church -Trial and death of Socrates

The Apology, Crito, and last
part of Phaedo (Chapter
LXIII to end).

Rustin-Secamo and Lilies, from which only the following lectures are prescribed -

King's Treasuries!

· Queen's gardens '.

(b) For general study.

Dickens—Tale of two Cities.

Macaulay-History of England, Chapter

Poetry,-(a) For detailed study-

Browning —A Grammarian's Funeral Shelley—The Clond. Keats—Ode to a Nightingale Tennyson—Sir Galahad

Longfellow-King Robert of Sicily.

(b) For general study-

Shakespeare - Merchant of Venice.
Tennyson - The Lolus Eaters (the Choric

Song excepted). Crossing the Bar.

" Ring out wild hells."

Keats-St. Agnes Eve.

Byron-"The Defeat of Sennacherib"

There may be none of beauty's

daughters,

Shelly-To night.

Newman-Lead Kindly Light, Whittier-The Eternal goodness, stanzas

10, 11, 16, 17, 18, 19, 20.

Tagore-Three poems from Gitanjali, viz
35.--" Where the mind is without fear and

the head is held high."
45,—" Have you not heard his silent steps?"

49 - "You came down from your throne and stood at my cottage door "

Supplementary prescribed texts for candidates whose mother-tongue is English:—

Coming and Passing of Arthur Hereward the Wako.

Norz. -(a) Half the total of marks will be allotted to the portions for detailed study, 50 per cent to the portions for general study and 20 per cent to the nesterops and erammar.

- (b) Grammatical questions will be a ked, including Parsing, Analysi, the Sequence of Tennes and Convertion of the Direct and Indirect forms of speech.
- (c) The attention of cand dates is drawn to the fact that examiners have been instructed to deduct ma is for macentacy in English.

CLASSICAL LANGUAGES

(a) Sanskrit

There will be three papers one un Poetry and Dramma, the second on Prose and unseen and the third on Grammar and Composition

Paper I .- Poetry and Drama-

- (a) (1) Raghuvamasha Canto XIII.
 - (11) Bhatti Kavya, Canto II
- (b) Shaknntala Act IV.

Note -1 Students are expected to explain in Banskrit selected
palanges by giving the context synchyms of the different words, and
analysing compounds where necessary and add no the purport

2 ha questions purely on Pragnit shall be asked,

Paper II .- Prose and Unseen -

- (a) Prose-Dass Kumara Charita বিমুল কালৈ only.
 - (b) Unseen-(c) Kama Katha Manjari, published by Bharat Honse, Lahore

(11) Kusumamala, Part II

hore —I The candidates are expected to farminance themselves with the language and style of the Equa period and of the works like the Kusummanala.

z Stud at should be taught to study these books by themselves with the help of a Sanshitt English Dictionary

Paper III -Grammar and Composition

Books recommended -

- 1 Aptes' Guide to Sanskrit composition.
 - ' Kales Sanskrit Grammar.
 - 3. Vidya Bhushan's Sanskrit Grammar

In addition to the course in Grammar prescribed for the High School Examination of 1925, the course in Grammar for the Intermediate Examination of 1925 shall consist of the following:-

The remaining declensions of all noins and pronouns, conjugations of the verbs of all the ten classes in all the Laharas, the use of six karakas, the four classes of Samasas, and Krit and Daddhita forms

N B -Sanskrit must be written in the Devanagari character

I.-ARABIC AND PERSIAN

Three papers will be set in each of these languages. The first paper will oe on the prescribed Text books and Gammar. The second paper will contain passages for ranslation into English from the books recommended for rapid reading and from others of equal difficulty. The third paper, on Composition, will contain a passage or passages of English Prose to be rendered into the Classical Language.

(b) Arabic,

Prescribed course—

(1) Text-Selections in Arabic Prose and Verse (Anwar Ahmadi Press, Allababad.)

(ii) Grammar -- Mabadi-ul-Arabia, II Urdu Edition Muntabai Press, Delhi.)

Rapid reading-Qilyobi-Nawadir-ul Hikayat. (First half)

None - Arabic words must be written in the Arabic character

(c) Persian

Prescribed course-

(1) Text-

إس مثل عدان آوردة لم تا to ترا همان ييش آيد كه راهد را (1)

دشم را کے بد سیا to چنانچہ کیل دریا (3) and (4) دمدد گفت مرا ممل اوین متصون to Am Akbari, vol III pages 291-298, from مامير چارة سكاليم to بالا مو كمناو شاهي to دارو ده يدېده (1) excluding from

مديها إرشيطان داستور

to هنگامه آراستن (2) هرحي سانة لوحان to در ويين سم رن) and

شكست رار ليستادے

مصما معدل كروند ما إرسانات يعانات البي Tuzuk Jahenguri - from (as is in Matriculation Course 191° 13). Safar- namab. إينها مي رتصيدنه to و شعنه درم دنتماه Shah Iran-from (as in the Intermediate Course 1913-14)

Poetry - Diwan Hafiz (1) to (47) Intermediate Course, 1912

Salman Saoji, Qasidas beginning with-

(1) ای سال ملک را شمشید تو مالک ردان

(۲) داه سعم کی د والے تو حال دعد

(T) دول رسيدة ستحوكاة در مدام حصور

(٣) منم إمره و لله شب هندال مس

(٥) حر اگر دردة تر إس روعه بدد رواع دار

Zahir, Faryabi, Qasidas beginning with

(1) شہم ہم تو ادت شادی محان دھد

(۲) سبيدة دم چو ر ده آم حيمه در گلرار

(طمع مدار وقار comit the couplet) (٣) سىيدة دم چو شدم منتوم سراے سرور

(٢) چين ب للك طليعة شب كشت آشار

(11) Grammar— نامرائد by M H. Nasırı, Chapters
I—VII. (Mission Press, Allahabad)

Rapid reading—Sear ul Mutaakbirin, from--دوكنة عادكور ارحيال وقت 10 دكر سلطمت طيهرالدس محمد دار داشاة حصر سط حرامند 10 موتموالك له دكر إحوال (excluding from

Students who offer Persian are required to have such a knowledge of the Etymology of the Arabic language as will enable them to explain all Arabic words and phrases which may occur in the Text-books and in the books recommended for rapid reading in Persian

NOTE .- Person words must be written in the Pers an character

II-LATIN GREEK AND HERREW

Three papers will be set in each of these languages according to the following scheme -

Paper I-Set books * Two hours
Unceen (Prose) . . . * One hour.

Paper II—Set books * Two hours.

Unseen (Poetry) * One hour.

Paper III—Grammar ... * One hour.

Composition . * Two hours

In papers I and II half the marks will he allotted to Unseens and in paper III two thirds of the marks to Composition As Composition a passage or parsages of English Prose will be set to be realered into the Chassical Language

(a) Latin.

The papers will be as follows --

Paper I —CIGERO ·—In Catilinam I—IV, and Livy,
Book XXII Chapter 1—51, Unseen Prose.

Paper II —Honace Odes II and III, Unseen Verse Paper III—See above

Grammar recommended—Gildersleeve's Latin Grammar

^{*} Time indicated merely for guidance of examiners in setting papers

(b) Greek.

The papers will be as follows -

Paper I -- PLATO: Apology and Crito, Un een Proce.
Paper II -- Sofficeles Antigone. Unseen Verce

Paper III—See above

Grammar recommended—RUTHERFORD'S Greek Gram-

(c) Hebrew

The papers will be as follows --

Paper I—GENESIS and SAMUEL, Book I, Unseen Prose Paper II—PAALMS XVI—LXX, Unseen Verse Paper III—See above

HISTORY

There will be two papers in each group A student may take either A group or B group or both

A Modern History and Allied Geography

I -Indian History from 1000 A D

Books recommended Lame Poole, S., Middeval India -T Fisher Unwin,
Limited.

SMITE, V. A: Oxford History of India,—Oxford University Press

ROBERTS, P. E.: A flistorical Geography of the British dependencies—Vol. VII, India, Part I.—History to the end of the East India Company (Oxford, Clarendon Press)

II —Either (a) Outlines of Modern European History from 1500 A D

Books recommended -

GRANT · History of Europe —Longmans, Green & Co Thaucher and Strewill. History of Europe.—John Murray, London

ROBINSON History of Western Europe -Ginn & Co. New York

Or (b) Modern English History from 1485, with special reference to the growth of the Empire

Books recommende I

WARNER and MARTEN Groundwork of British History, sections II and III, Blackto & Son, Limited. KERY AND RUSBEROOK WILLIAMS Growth of the British Empire—Longmans, Green & Co

B Ancient History and Allied Geography

I -History of Greece

Books prescribed -

EDMONDS C D Greek History for Schools, - Cambride University Press

ABBOT Perteles - G Putnam & Sons

II -History of Rome

Books prescribed -

BYPART, E.E. A Short History of Rome (Cambridge University Press)

SHUCKBURGH Augustus

Logic

There shall be two papers of three hours each the first on Deductive Logic and the second of Inductive Logic

Deductive Logic

The following syllabus is prescribed -

Definition, scope and value of Logic Nature of thinking The laws of thought. The relation of thought and language Terms and their classification Denotation and Connotation of terms. The predicables Formal division and definition Fropositions, their import. Reduction of statements to logical form Distribution of terms. Nature and forms of inference. The opposition of propositions and various forms of education. The syllogism, its figures and moods. Reduction, direct and indirect. Hypothetical, disjunctive and mixed syllogisms. The Dilemma, Enthymene Sorties and Epicheirema, Function and value of Syllogism. Analysis of deductive arguments. Fallac es

Inductive Logic

The following syllabus is prescribed -

The nature and presuppositions of inductive inference Causation its significance and importance in induction Observation and experiment Classification and nomenclature Hopothesis Imperfect inductions—simple enumer ation and analogy Methods of scientific induction Analysis of inductive arguments and application of inductive methods Explanation and establishment of laws Therelation of inductive induction to deduction Fallacies

Books recommended (not prescribed) to indicate the standard of treatment of the tops, s prescribed -

Introductory Text book of Logic S H Mellone -Blackwood & Son Edinburgh

Intermediate Logic Welton & Monahan -University Tutorial Press London

Groundwork of Logic Welton — Messrs Macmillan & Co

ELEMENTARY ECONOMICS Introductory

Subject matter Relation to other sciences The dave-

Production

Relation between wants and production The factors of production

Land -- Natural resources of India. Soil and Climate Sources of Power Raw materials

Labour — Density and distribution of population in India. Health and vital statistics Occupations

Capital—Enddings and machinery Means of communication and transportation in India, Irrigation

Organization —Combination of the factors of production in village industries and in factories. Efficiency of the factors of production. Different uses and how efficiency

increases Efficiency of labour increased by education Division of labour and specialization of machinery. Large scale production and its limitations. Diminishing and increasing returns. Development of industrial organization. Its relation to means of transportation. Accompany ing changes in ryral to lusteres and in agriculture.

Exchange

Utility -- Marginal and total utility Law of diminishing utility Law of demand

Barter - Conditions of barter How both parties gain

in utility by exchange

Exchange by sale and purebase Demand and supply schedules and curves Balancing of demand and supply in a local markets Relation of price to expenses of production Changes in the expense of production The development of markets Causes of the extension of markets India's imports and exports

The machinery of exchange Money and banking The Indian currency system and the organization of credit in India (both to be treated in an elementary way)

Distribution

The problem of distribution

Rent -The law of rent as applied to India Land tenure in the United Provinces

Salaries and wages Real and money wages Tho standard of living Mobili y of labour in India Influence of social customs

Interest — Net and gross totorest Mobility of capital in India Principles of co operative credit and its advantages for India

Profits —As the reward of enterpise Business oppor and moods n India

disjunctive at Consumption

meme Soractivitas the end of all economic activity Wants Syllogism lassification Division of iocome among different items of expenditure. Family budgets Relations of saving to spending. The social side of spending

Taxation

Classification of revenues, the tax system and its incidence in India.

The following books should be conculted -

Penson - Economics of Everyday Life, Parts 1 and 2 Moreland - Introduction to Economics for Indian Stn

deuts

Banera - A study of Indian Economics.

Teachers should also consult :-

F. G Age -Iddian Economics

Marshall - Economics of Industry

Chapman -Elementary Economics

Juck — Economic Life of a Bengai district.

Mann — Lite and labour in a Deccan village.

Practical work

In view of the fact that many students will leave college to earn their living after the Intermediate Examination and that many government positions are now being opened to men who have passed this examination, the course should be taught in such a way as to make it of real practical use to students in after life. Teachers must be given facilities for taking students on the ostudy small industries, markets, and condy? of living in both city and country. The principles should be illustrated from these studies. The examiners are to inspect and mark the principal work of each student, as follows —

Two family budgets, one of au artisan, one of a cultivator with the student's own deductions

Two balance sheets, for one month, or more, of small-scale industries, with suggestions for improvements in the industry (For example, farming, wearing, pottery, carpentry shoe making, tailoring basis et making, the gwala, the mithat-wala, etc.)

Diagrams representing the above budgets and costs of production in the industries as percentages of the total

Written work

Teachers should insist on as much written work as possible. The following methods are suggested —

Nore - Touchers should not usually distate notes, but should require students to write out their own notes after each lecture from rough notes taken in class and from memory. These notes should be inspected and marked by the teacher.

Questions—At the beginning of the lecture period teachers should frequently give out a single question on the work of the day before and allow the student 5 or 10 minutes to write out the answer which should be corrected and returned to the students.

Essays -Occasional esways may be assigned.

N. D.—Proctical and written work shall be given 15 per cent, each of the total marks for Economics. There shall be two papers each of which shall be given 35 per cent of the total marks. The first shall cover production and exchange the econd the rest of the course

INDIAN VERNACULARS

(For girls only, in place of a Classical Language)

A MODERN EUROPEAN LANGUAGE

(For girls only, in place of a Classical Language)

There will be three papers of three hours each. The first paper will consist of extracts from the prescribed Text-hooks together with grammatical questions. The second paper will contain unseen passages for translation from French into English, these passages not to be taken from the prescribed Text-books. The third paper will consist of a passage or passages of English prose to he translated into French.

French

Prescribed Text-books-

ERCRMANN CHATRIAN . Le Consent.

DAUDET. Tartarin sur les Alpes (Siepmann's edition)

Le Voyage de Mousieur Perrichon. Labiche et Martin (Hachette et Cie)

Grammar recommended—French Grammar (Sonnen schein's Parallel Grammar Series),

MATHEMATICS

There will be three papers in Mathematics —One paper in Algebra and Trigonometry, a second in the Geometry of Conces and Solids and the elements of Coordinate Geometry, and a third on Elementry Dynamics,

- (1) Algebra —Quadratic equations involving two or more unknown quantities the theory of quadratic equations and of expressions of the second degree, imaginary expressions, arithmetical, geometrical and tarmonical progressions, permutations and combinations theory of indices and logarithms, proof of binomial theorem for a positive integral index and the nee of himomial and exponential theorems for any index.
- (2) Trigonometry—Including Solution of Triangles, and simple pr blems on inscribed, circumscribed, and described circles.

- (3) Plane Geometry Proportion similar triangles, the properties of the parabola ellipse and hyperbola treated geometrically
- (4) Geometry of soluds —Elementary properties of lines and planes surfaces and volumes of parallelopipeds and right prisms pyramids circular cylinders and cones spheres, and spherical segments frusts of pyramids cones and spheres with numerical applications
- The use of Trigonometry and Logarithms shall be permitted in solving numerical examples
- (b) Co-ordinate Geometry The properties of the straight line and errole treated by rectangular and polar co-ordinates the properties of the parabola ellipre and hyperbola, and their tangents and normals deduced from the simplest equations of the contes in rectangular coordinate.
- 6) Dynamics and Statics—Velocity composition of velocities relative velocity, acceleration, rectilinear motion under uniform acceleration composition of accelerations. A ewion a Law of Motion rectilinear motion under gravity in a vertical and down an inclined plane, motion of two masses connected by a citing passing over a pulley, projectiles direct impact of smooth bothes definition and calculation of kinetic energy co planar forces parallel and non parallel and their composition equilibrium of a hody under three forces, moments con li ions of equilibrium of a body under a system of coplanar forces and simple eximples centres of gravity friction work and power, simple machines (lever balance system of pulleys wheel and axle differential wheel and axle)

The following books are suggested -

S bool Algebra, Part II by Paterson (Clarendon

Elementary Algebra Part II by P Ross (Longmans) Hall & Stevens' School Geometry Parts V and VI Co-ordinate Geometry Smith or Loney (Macmillan's) Come Sections Wilson (Macmillan's)

Elements of Statics and Dynamics by Loney (Cambridge University Press)

PHYSICS.

[A B —Candidates τ : I be required to pass in the theoretical part of each Science subject]

There will be two papers as follows -

1st Paper-Heat and Light

2nd Paper-Sound Electricity and Magnetism

The following syllabns is rec mmended -

General properties of Matter - l'undamental umis and their measurement Principle of Balance Verniers Calipers Server gauge Spherometer, Volume Density, Specific gravity Fluid pressure Principle of Archimedes, Nicholson s'hydrometer, Barometer, Loyle Slaw, Fumps Siphon, Elementary notions of rolume elasticity, rigidity and Young's modulus in the case of solids I sechermal and adiapatic elasticities of gas es Gravitation simple harmone motion Pendulum Value of g'

Heat — Temperature Thermometers Calorimetry
Specific heat Latent heat Expansion of solids, liquids
and gases Vaponr pressure Hygrometery Change of
state Laws of unsaturated and esturated vapours Conduction Convection Radiation Reflection and absorption
of heat I sothermal and adiabatic changes Specific heat
at constant volume and constant pressure Relation of
heat to work Determination of J

Light — Laws of propagation Reflection and refraction from plane and spherical surfaces Dispersion Spectra. Fraunhofer's lines Telescope Microscope Spectrometer Photometry Phosphirescence Fluorescence Velocity of light

Sound -- Lissainn'a figures Transverse and longitudinal waves Nature of sound waves Intensity Pitch Quality Mode of propagation Reflection Refraction, Stationary waves Beats, Rosonance Vibrations of strings and air columns Monochord and organ pipes Determination of velocity in solids, liquids and gases Muscal scale

Electricity and Magnetism.—Wagnetisation Perma nent magnets Magnetic midgetton Unit of magnetisms Magnetic field. Lanes of force and lines of induction. Tangent A and B positions of Gains Deflection and vibration Magnetic memeris Hagnetic moments Earth as a Magnet. Magnetic elements H. Declination and Dip and their determinations | Lectrostatic unit of quantity Coulomb's law of force | Electrostatic unit of quantity Coulomb's Electrostatic unit of quantity Coulomb's law of force | Surface density Potential Capacity Leyden jar Capacity of a parallel plate condenser | Flectrophorns Wimsshreti's machine

Voltar-cell Electric current and its magnetic effects E. M. unit of current Gilvanometers. Ammeters Voltameters Ohm's law and its verification. Unit of resistance and P. D. Specific resistance. What stone is bridge. P. Obox. Heating effect of current Joule's law Determination of J. Electric glow lamp. Electric arcs. Chemical effect of current. Faraday's laws of Electrolysis. Electrochemical quivalent. Voltameters. Electro-magnetic relations. Electro-magnet induction. Induction coil. Simple dynamo. Motor Electric Telegraph. Telephone. Micro-modor.

The scope of course is approximately indicated by R. S. Willows: A Text book of Physics (published by Messrs Arnold & Co) and this book is strongly recommended.

There will also be an examination in practical work.

The laboratory conrects and ated by the subjoined list of experiments. An account of each experiment must be written by the student in a special note-book which will be examined. The account of each experiment should be signed by the Demonstrator, and the books should be kept in his charge.

LIST OF EXPERIMENTS

of 'g 'by the pendulum

Mechanics

Applications of the Triangle of Forces

Equilibrium of Parallel Forces

Principle of Moments

Determination of co efficient of Friction

General Properties of Matter-

Measurements of Mass by the balance

Use of the Spherometer

Use of Screw gauge

Use of Callipers Barometer

Heat-

Testing fixed points of Thermometers
Determination of Specific Heats

Ditto of Latent Heats

Construction of a graph illustrating the rate of cooling of a liquid

Boyle's Law

Determination of co efficient of linear expansion

Light-

Reflection and Refraction of Light at plane and spherical

Determination of Refractive Indices Focal lengths of Virrors and Lenses

Sound-

Determination of Velocity of Sound by resonance

Ditto the frequency of a fork by sonometer

Magnetism-

Mapping out lines of force by a small magnet
Determination of Neutral points in a magnetic field

Comparison of magnetic moments by the magnetometer

Electricity-

Variation of magnetic force at centre of a coil with radius number of turns and strength of current

Determination of resistance by the use of Wheatstone's wire bridge

Determination of resistance by the use of Ammeter and Voltameter.

Combination of cells in series and parallel

D.tailed accounts of the method of performing the above experiments will be found in other Willows' Text hook of Physics or in any Intermediate course of practical Physics such as Schuster and Lees

CHEMISTRY

[\ B -- Candidates will be required to pa s in the theoretical part of each Science appear.]

There will be two papers and a practical examination

The following syllabus is prescribed -

The course as for the High School Examination with in addition elementary and compound substances, mixtures, solution, chemical action, the laws of definite and multiple proportions, simple methods of the determination of equivalent weights atoms, molecules, atomic and molecular weights, vapour density, the atomic theory and "Avogadro's hypothesis, combination of ga"es by volume

Valen v, relation between equivalent and atomic weight, simple metheds of determination of atomic weights, Dulong and Petit's Law

Boyle's Law, Charles' Law, vapour pressure, diffusion Chemical symbols, formulae and equations, calculations of an easy nature

Oxidation and reduction

Elementary ideas as to the nature of dissociation in gases and electrolytic dissociation theory

The outlines of the periodic law, studied from element prescribed in the course

Preparation and important properties of the following elements and compounds and proofs of the composition of the compounds marked.

Hydrogen, oxy,on, *water, ozone, hydrogeo dioxide, mitrogen, the *atm sphere, the effects of animal and vegetable life upon its composition, *ammonia, mitric acid and mitrates, nitrous acid and mitrates, nitrous acid and mitrates, nitrous acid and entries, *introus acid entries, of earhou, *carhou monoxide, elementary ideas about combustion and ettructure of flame coal gas, chlorioe, *hydrochloric acid the chlorides, chloric acid and ellorates, bromine, johne, therr hydracids and falls

Sulphur, *hydrogen sulphide, sulphur *dioxide and trioxide, sulphuric acid and the sulphites, sulphurous acid and sulphites

Phosphorous, hydrogen phosphide, phospharous trioxides and pentioxi le, orthophospheric acid

Silica, silicates of Na, K & Ca, glass

Sodium, potassimm, their hydraxides, chlorides, nitrates, carbonates sulphates

Calcium, strontium, Barium, and their oxides carbonatics, sulphates chlorides, nitrates

Magnesium, its oxide chloride, sulphate, carbonate and nitrite Zinc, its oxides, chloride, sulphts and carbonate

Lead, its chloride sulphate, and nitrate

Copper, the outlines of its actillurgy, its oxides chlorides sulphite and natrate

Iron, the outlines of its metallurgy, its oxides (FeO, Fe₂O₄ Chlorides and sulphates

Organic -

A The preparation typical properties and structural relationship of the following compounds —

Mathane, cthaoe, ethylene, chloroform iodoform

Methyl alcohol and ethyl alcohol

Formaldehyde and acetaldehyde

Formic acid'and acetic acid'

Ethyl acetate and methyl a etate

Acetamide acetyl chloride, acetic anhydride Methylamine B The de criptive properties of the following —
Acetylene, glycerol, acetone, ether oxalic acid tartaric acid, fats "cape (and "asponification) starch,
cane singar, grape singar (and fermentation), nrea,
henzene phenol an line benzoic acid.

PRACTICAL WORK

Students will be examined in Practical Chemistry

Students are expected to perform the following exp riments in the labratory. An acount of ca h experiment must be written by the student in a special note-hook which will be liable to examination by the Examiners. This note-book should be kept in the charge of the laboratory instructor and each eccount of an experiment should be signed by him. The Principal of a College will be a special for the production of this no e-book when demanded by the proper authorities.

The practical conre is as follows -

- 1 Such practical work as is required for the School Leaving Certificate or Matriculation Examination
 - 2 Qualitative analysis of simple salts
- 3 Preparation and partification of simple salts involving no special difficulty.
- 4 Simple gravimetric and volumetric estimations, such as estimation of alkali ends and alkaline carbonates by titration, gravimetric estimation of iron and simple gravimetric experiments such as change it mass on oxidation of magnesium etc.
 - 5 Determination of incling and boiling points, fractional distillation
 - 6 Qualitative dete tion of bydrogen mitrogen, sulplar, and halogens in organic compounds

Books suggested -

SHENSTONE Inorgani- Chemistry (Arnold)
Roscoe and Live Elementary Inorganic Chemistry

ROSCOE and HARDEN Inorganic Chemistry for Advanced Students

A Class Book of Organic Chemistry by J B Cohen Organic Chemistry Part I by Perkin & Kipping Donington's Class Book of Chemistry, Parts 1-4

BIOLOGY I - Zoology

[N B -Cand dates will be required to pass in the theoretical part

of each Science subject 1

A -Living and non-living matter The distinctive properties of living matter of protoplasm and its chemical composition The structure and life history of Amoeba and malaria parasite as examples of the Protozon A general concep ion of the structure and phenomena of the animal cell direct and indirect cell division. The union of cells to form tissues and the combination of tissues to form organs

B -The structure of Hydra as an example of the Meta zoa The principle of the physiological division of labour and the correlated differentiation of structure

C -The structure and bionomics of an Indian Earth worm as an example of a segmented animal

D - The structure of the cockroach as a type of Arthro poda Metamorphosis among insects as illustrated by the life history of the common mosquito

E -The general characters of the Chordata

F -The general anatomy histology and physiology of the various systems or organs in the Froz

G - An elementary knowledge of the anatomy and osteology of the Rabbit or other common Mammal The brain and eye of the shrep and the skull of the dog may be substituted for those of the rabbit

H -A general classification of the animal kinglom with the characteristics of the principal phyla

J Reproduction sexual and asexual ova and sper matozoa oogenesis and spermatogenesis. The elementary facts of the fertilisation and segmantation of the ovum the outlines of the development and larval history of the Frog, the three primary germ layers and the organs derived from them

II —Botany

[V.B.—Candidates will be required to pass in the theoretical part of each Science subject [

A —The structure and germination of seeds the morphology of the root, stem, and leaf. The chief types of floral structures. The chief type of inflorescence and the common types of fruits.

B ~ The parts of a typical vegetable cell, the cell contents and their microchemical reactions the division of a cell the chief types of plant it sues. A comparative study of the internal structure of the root stem and leaf of the Angiosperms. The structure of the reproductive orrans of the Angiosperms.

C -The structure of Bacillus subtilis and the modes of nutrition among the Bacteria.

D -The structure physiology and life-histories of Ulutherix Surrogyra, Mucor and yeast

E.—The structure and life bistories of a moss and a fern, and the phenomenon of Alternation of Generationa

F -The life-history of Augus perms

G - An outline of the classification of the vegetable kingdom to illustrate grades of structure and method of reproduction

H.—Elementary plant physiology, stability of the plant body, the usual con-th neuts of plant food, as-umilation, transpiration, respiration, the main facts about growth, the chief types of movements

PRACTICAL WORK

Students are expected to keep a record of all practical work in a special laboratory sketch book, which will be hable to examination by the Examiners The laboratory in structors should sign the result of each days practical work A -The microscopical study of Amoeba and flydra, the study of Hydra by means of transverse and longitudinal sections

The general dissection of the Earth worm, Co kreach and Frog, life history of mosquite, a microscopical study of the chief animal tissues from fresh or prepared preparations of muscle, nerve cartilage bone blood and connective tissue. The microscopical study of the Earth worm by means of fresh preparations and transverse excitions, a microscopical examination of the kidney, liver spinal cord, stomach ovary and tests of the Frog. The skeleton of the Frog.

The osteology of the rabbit substituting the skull of the dog for that of the rabbit, and the dissection of the alimentary, vascular, and reproductive systems of that animal

B—The dissection of plants and parts of plants, the preparation, simple staning and study of microscopical examination and otherwise of Bacteria, Yeast, Spirogyra Ulottrix Micor and a mass a Fern and the vegetative and reproductive organs of Angiosperms treated in an elementary manner

The description of a flowering plant and its parts in semi-technical language

(Where fresh material cannot be obtained recourse should be had to prepare spe imens)

Text books suggested -

Parker and Bhatria Elementary Course of Practic d Zoology, (Macrillan)

Holmes Biology of the Frog

MARSHALI AND HURST Processed Zoology (Marray)
RANGACHAPI Botany for Indian Schools, 2nd Edition.
(Government Press Madras)

GAGER Fundamentals of Botany (Blakiston)

COMMERCIAL DIPLOMA EXAMINATION OF 1925

The fellowing are the subjects of examination — Compulsory subjects—

- 1 English, including correspondence
- 2 Book-keeping and Accountancy
- 3 Business Methods and Elementary Economics
 Optional subjects—

One of the following -

- 1 Commercial Geography,
 - (a) General
 - (b) India
- 2 Typewriting,

01

3 Shorthand

The following papers will be set -

- 1 English, inc ading correspondence -Two papers of three hours each
- 2 Book Leging and Accountancy -Two papers of
- 3 Business Methods and Elementary Economics Two papers of three hours each, one paper on business a methods and one paper on Elementary Economics
- 4 Commercial Geography—One general paper of three hours. One paper on the Commercial Geography of India of three hours
 - 5 Typewriting -One paper of three hours
 - 6 Shorthand One paper of three boars
 The syllabus in each subject is as follows —

English including enrrespondence—1 Drafting of commercial and official correspondence, with special attention to grammar, syntax, punetnation and use of commercial terms and vocabulars.

2. Essay writing and composition with practice in expansion of summarized ideas into full statements and the rorsa

- 3 Reading duly newspapers with practice in editorial writing and newspaper articles especially on commercial topics. Ability to understand the financial and business section of the newspapers.
 - 4 Précis writing

[Notz -It is suggested that papers in this subject may follow the lines g wen below]

First Paper—Commercial English— This will consist of—

- (a) Draft of commercial and official correspondence
- (b) The writing of a short article to indicate an intelligent knowledge of commercial terms
 - (c) Précis writing

Second Paper-General English-

This will consist of-

- (a) Translation from indirect to direct speech and
 - (b) Rewriting of incorrect or badly constructed
- sentences

 (c) Synthesis of simple sentences and the resolution
 of complex sentences
- (d) An cesay on a subject of general interest

Book keeping and Accountancy—The principles of Double Thery Book keeping and their application. Looks of original entry, inclinding Tabular Forms. The Ledger Trial Balance Trading Manufacturing and Profit and Loss Accounts, with apportionments and adjustments. Balance sheets Loose Leaf and Card Inlex system of Book keeping Self Balancian Ledgers. Single Entry Book-keeping.

In the treatment of the above the following mitters will be included — Cheques Bills of Exchange and Proms sory Notes, Goodwill, Classification of Assets, Bad debts, Depreciation, Reserves and Suking Funds, Consignment Joint Venture and Contract Accounts, Partnership and Company Accounts (including the Double Account system) Capital and Revenue, Investments, Accounts Current and Average Due Dates —

Business methods —I The general routine of a Business Honse —Inward ant Ontward correspondence (excluding drafting) Me hods of rapid communication Duplining processes

- 2 The significance of Trade, Commerce and Industry Manufacturing and Distribution Hone. The baying and selling of goods. Hereantile Enquiry Agencies. Importation and Exportation of goods. Documentary Bills Elementary Fire and Marine In mrance 19 applicable to this section. Use of Card Indexes.
- 3. The meaning of the principal common real terms occurring in connection with the above and the preparation of the chief documents involved including arithmetical calculations.
- 4 in elementary knowledge of the Indian Law of Contracts Indian Negotiable Instruments Act and the Indian Registration Act

Elementary Economics — (The treatment of the subject should be very elementary and as far as possible it should be illustrated by reference to Indian conditions)

The subject matter and scope of Economics fundamental notions and simple definitions. Relation between wants efforts and satisfaction

Production —Factors of production Land Labour Capital and Organization

Nature and Limitations of Land Division of Labour and other factors of efficiency of labour Organization of capital

Laws of increasing diminishing and constant return.

Wants -Diminiching ntility Value-its determina-

Machnery of Exchange —Money and its functions Qualities most destrable in entrency—legal t-index—token money—Gresham's Law—Paper Currency—Convertible and Inconvertible credit—Credit instruments—Bills of Exchange—Cheques Indian Currency—The Gold Exchage Standard—The Gold Standard Reserve Council Bills—Heverse councils— Indian Currency during and since the war—Indian Banks and the chief functions performed by them—the Imperial Bank the Exchange Banks and Indian Joint Stock Banks

Distribution —Rent—interest—wag s—profits (with particular reference to Indian conditions)

Books recommended -

PENSON Economics of Every Day Life Part I Moreland Introduction to Economics

JEVONS Money and Banking in India

Commercial Geography A General—I (a) Phy singraphic Control of Commerce Climate Effect of climate on registation Vegetation regions Destribution of important commodities as wheat rice cotton barley flax jute etc., and conditions under which they are severally produced.

(b) Vegetation its relation to industries

(c) Trade routes connecting the most important regions prolucing the different commodities as studied above and the important markets for them Forts Localization of Industries

II A study of the various types of geographical iegions from the stand point of commerce particularly of the West marginal type in Europe the East marginal type in Monsoonal Asia and of continental types in N America.

This would imply an intelligent study of the physical factors of the different regions more particularly in relation to their effect on climate agricultural production and the easiest lines of inland communication whether by water road or zail Special attention should be paid to the geographical distribution of industrice)

B India - A study of the Commercial Geography of India on the regional basis involving the study of -

(a) Surface features and physical structure

- (b) Climate.
- (c) Agricultural products
- (d) Irrigation—the canal system of N India
- (e) Distribution of minerals
- (f) Industries—Present condition and tendencies of

industries in the United Province

Nort —In the study of tegranal types special att ninen may be devoted to the parts of the British Empire occurring in thise types

TVPE-WPITING

This will be the same as for the High School Examination but of a more advanced character—the speed to be 30 words per minute

SHORTHAND

- 1 Writing in Shorthand from a pa. age dictated at the rate of 80 words a minute, for a period of ten minutes
- 2 Writing in Shorthand from a business letter of general commercial phraseology, dictated at the rate of 80 words a minute, for a period of five minutes
 - 3 Transcription of both the above,

HIGH SCHOOL EXAMINATION OF 1926

A-COMPULSORY SUBJECTS

I -- ENGLISH

Three papers will be set—(1) on the prescribed course in prose and poetry with ancestions on grammar, idiom etc., (2) on urscen pressages with questions on grammar and idiom, (3) passages in an Indian Vernicular for translation into English and a simple narrative or descriptive composition in English. In the cwo of candidates who offer English as those mother tongue the third paper will consist of an essay to be written in English. There will be no oral test, but there will be an eximination in English dictation at each contre

Books proscribed . -

Group A. -

- | Macmillan's English Prose Selection ..
- The Star of India Poetry Book, from which the following poems are prescribed —

Lochinvar, The Assyrian Came Down, The Slave's Dreum, The Charge of the Light Brigade, Incident of the French Camp Abou Ben Adhem, A Farewell, Home Trey Brought Her Wortior Dead, Now, Maximus, I Will be Worthy of It, Forty Years On.

or

Group B --

1 Holme's Literary Readings - the following

No 7 - Louis XI at a Boar Hunt

No 12 -Rural Lafe in England

No 15 -A siege in the Olden Times

No 16 -The Stage Coach

No 18 -Under Ivan the Terrible.

2 Children of the Motherland, by Mrs Besant The following chapters excepted —

Part I Chap er VIII—The Founder of Sikhiem

3 Shool Favornites from which the following poems are prescribed —Lochinvar, The Poets Song The Honest Man The Plate of Gold The Deserted Village To a Water fowl To the Cockoo (Wordsworth) The Difficults (Wordsworth Alexander Selkirk, A P aim of Life Ring ont Wild Bells, The spacing Firmanment)

Group C --

1. Longmans Matricolation Selections, from which only the following are prescribed — The Gorgon's Head The Mirstenlens Pitcher, The Pignies, The Derwish's Story, His tory of the Poet Askar, The Adventures of Three Shipwrecked Boys on a Coral Island of the South Seas, A Lesson of Faith, The Law of Anthonity and Obedience, Red Snow, An Adventurous Journey, Early Rising, Reading, Rural Life in England, From the Story of Alad din or the Woodstrial Lamp.

- The African Magictan
- ' The Cave or the Lamp
- 3 The Genie of the Lamp
- 4 Aladdin's Marriage

2 A Bco of Golden Deeds hv longe, from which only the following stories are prescribed —

How One Man has caved a host The Pass of Thermoppiae The Two Friends of Syr cuse The Last Fight in the Coll seum Fauth'il till Death. Children of Blentaran Ghyll Casal Noo The Mad Dog. Monthyon Prizes Discipline

3 Indian Schools Book of Verse, from which the following poems are prescribed —King Bruce, The Slave's Dream, The Lotes Pool, The Plate of Gold, The Honest Man, The Toys, Incident of the French Camp, The Old Order Changeth, Propice, My Heart Leaps Up The Tiger

N.D.—The above text bools are arranged in three alternaire Groups A, D, and C, and cach school is at liberty to make its an intestion taking any in so of the Groups or elevants from the different Group provided the choice includes one book of Price Stations, one book of Inspirational Stores and one book of Price Stations, one book Group A mus' select a book of Inspirational Stores from Group D or Group A mus' select a book of Inspirational Stores from Group D or Group O.

Books recommended for rapid reading and indicating the standard of the unview passages to be set in the second namer --

In England, by S G Dunp Macmillan & Co 12

II -MATHEMATICS

There will be two papers each of three bours-o e in Arithmeti and Algebra and the other in Geometry and Mensuration

(a) STLLABUS

1 Arithmet c - Votation and numeration The four simple rules. The four compound rules in British and

Indian money and in Indian weights and measures in commen use in the United Provinces British and Metric system of measuring I in the area volume capacity and weight Factors Prime numbers G C M or H C E, by factors L C M Vulgar fractions Vulgar fractions of concrete quantities Protice Decimal fractions (excluding theory of recurring decimals) Protinal fractions of concrete quantities "quare root Ratio Simple and compound proportion Proportional parts Average Decimal approximations (including approximate value of recurring decimals) Contracted methods in the four rules in decimals Percentages Profit and loss Simple and compound interest Present worth and true dies not Problems (the use of algebrai at equations is allowed in solving prollems)

2 Algebra — The f ur simple rules Fractions Great est common measure Least common multiple Factors Proportions Simple Equations of one or moto unknown quantities with easy problems Squaro root Quadratic equations of one unknown quantity with easy problems Graphs of statistic Graphs of straight lines Graphical solution of linear simultaneous equations Simple graphical problems

A B -Candidates will be provided with squared paper of necessary

3 Geometr —The course includes both practical and theoretical Geometry and every candidate will be expected to answer questions in both branches of the subject. The questions on Practical Geometry will be set on the constructions contained in the annexed schedule A, together with easy extensions of them. All figures should be drawn accurately for which purpose, every candidate should provide himself with a graduated scale, a pair of set squares a protractor a compass, and a hard penel. The questions on theoretical Geometry will consist of theorems contained in the annexed schedule B together with easy extensions and deductions with numerical illustrations. Any proof of a proposition will be accepted which appears to the examiners

to form p rt of a systematic treatment of the subject the order in which the theorems are stated in schedule B is no imposed as the sequince of their treatment. In the period of the health should be permitted.

B -Land dates a II be new used to a squared gaper of necessary

SCHEDULE A

Bisec ion of angles and of straight lines Cans ru tion of p rp indiculars to straight lines Construction of an angle quarto i given angle

Con tu ion f par fiels to a given straight line

Simple case of the case up 100 from suffi ien data of angles and quadrilaterals

Division of a raight lines in o a gir a number of equal parts

Con ration of a triangle equal in area o a given polygon

Con remine of tangens to a circle and of common tangents to two circles.

Simple cases of the consideration of circles from sufficient data

Construction of rectangle equal to a given polygon

Construction of a rectangle on a given base equal in area to a given rectangle

Con truction of a square equal to a given rectangle

Construction of a rectangle of given area the sum or difference of whose sides is given. (These constructions should be based on the propositions on the Geometry of the circle)

Construction of a fourth proportional to three given straight lines and a mean proportional to two given straigh lines,

Construction of regular figures of 3 4, 6, or 8 sides in or about a given circle

SCHEDULE B

Angles at a point.

If a straight line stands on another straight line, the sum of the two angles so formed is equal to two right angles, and the converse

If two straight lines intersect, the vertically opposite angles are equal

Parollel Straight Lines

When a scraight line ents two other straight lines, if-

- (1) a pair of alternate angles are equal, or
- (ii) a pair of corresponding angles are equal, or
- (iii) a pair of interior angles on the same side of the outting line are together equal to two right angles, then the two straight lines are parallel, and the converse.

Straight lines which are parallel to the same straight line are parallel to one another

Triangles and Rectilineal Figures.

The sum of the angles of a triangle is equal to two right angles

If the sides of a convex polygon are produced in order the sum of the angles so formed is equal to four right angles

If two triangles have two sides of the one equal to two sides of the other each to each and also the angles contained by these sides equal the triangles are congruent,

If two triangles have two angles of the one equal to two angles of the other, each to each and also one side of the one equal to the corresponding side of the other, the triangles are congruent.

If two sides of a triangle are equal, the angles opposite to these order are equal, and the converse.

If two triangles have the thric sides of the one equal to the three sides of the other, each to early, the triangles are congruent If two right-angled triangles have their hypotenuses equal and one side of the one equal to one side of the other, the triangles are congruent

If two sides of a triangle are unequal the greater add has the greater angle opposite to it, and the converse

Of all the straight lines that can he draw to a given straight line from a given point outside it the perpendicular is the shortest

The opposite sides and angles of a parallelogram are equal each diagonal bisects the parallelogram and the diagonals bisect one another

If there are three or more parallel straight lines and the intercepts made by them on my straight line that cuts them are equal then the corresponding interests on any other straight line that cuts them are all o equal

Parallelograms on the same or equal bases and of the same altitude are equal in area

Triangles on the same or equal bases and of the same altitude are equal in area

Equal triangles on the same or equal haves are of the same altitude

Hinstrations and explanations of the geometrical theo rems corresponding to the following Algebraical identities --

$$k (a + b + c +) = ka + kb + kc + (a + b)^{2} = a^{2} + ab + b^{2}$$

$$(a - b)^{2} = a^{2} - 2ab + b^{2}$$

$$(a^{2} - b^{2}) = (a + b)(a - b)$$

The square on a side of a triangle is great r than equal to or less than the sum of the squares on the other two siles according as the angle contained by these sides is obtive right, or acute. The difference in the case of inequality is twice the rectangle contained by one of the two sides and the projection on it of the other.

Loca

The locus of a point which is equidistant from two fixed points is the perpendicular breeder of the straight line joining the two fixed points

The locus of a point which is equidistant from two intersecting straight line, consists of the pair of straight lines which bisect the angles between the two given lines

The Carete

A straight line drawn from the centre of a circle to bisect a chord which is not the diameter is at right angles to the chord, conversely the perpen licular to a chord from the centre bisects the chord

There is one errele and one only which passes through three given points not in a straight line

In equal circles for in the same circle), (1) if two ares subtend equal angles at the centres they are equal (1s) conversely if to ares are equal they subtend qual angles at the centres.

In equal encies (or in the same encicle) (s) if two chords are equal they cut off equal arcs (is) conversely if two arcs are equal the chords of the arcs are equal

Equal chords in a circle are equid stant from the centre, and the converse

The tangents at any point of a circle and the radius through the point are perpendicular to one another

If two circles touch the point of contact lies on the straight line through the centres

The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference

Angles in the same segment of a circle are equal, and if the line joining two points subtends equal angles at two other points on the same sides of it the four points lie on a circle

The angle in a semi circle is a right angle, the angle in a segment greater than a semi-circle is less than a right

angle, and the angle in a segment less than a semi-circle is greater than a right angle

The opposite angles of any quadrilateral inscribed in a circle are supplementary, and the converse.

If a graight line touch a circle and from the point of contact a chord be drawn the angles which this chord makes with the tangent are equal to the angles in the alternate segments

If two chords of a enrice inter-ect either in-; le or outside the enrice, the rectangle - manned by the puris of the one is equa to the rectangle contained by the parts of the other

4 Mensuration — Areas of rectangle circle triangle and (after mensurement) of any rectalment by the Length of the circumterence of a circle

The following books are suggested -

For Algebra-

Ross Elementary Algebra Part I, Longman, Green & Co. BARER and BOURNE. Ele ne ary Algebra Part I, G.

BAKER and BOURNE. Ele ac any Algebra Part I, G. Bell & Son-

H. S Fall School Algebra Parts I-II, Me re Mac-millan & Co

In Geometry-

HALL and STEVENS A School Geometry Parts I to IV, Mesers Macmillan & Co

For Arithmetic-

Grant's Advanced Arithmetic, Indian School Supply Dépôt, Calcutts

UI -HISTORY AND GEOGRAPHY.

There will be two papers, each of three hours—one in History, and the other in Geography

History

Syllabus -Oothnes of Indian History from the earliest time to the present day, and Outlines of English History from 1485. The following hooks indicate the scope and standard of knowledge required —

Indian History.

V. A. Smith .- Oxford Students' History of India (Oxford University Press, Calcutta).

Thompson - History of India (Christian Literature Society, Madras),

Har Prasad Shastri History of India (Blackie), Hoernle and Stark A History of India (Orissa Mission Press Guttack)

Students Atlas of Indian History (Macmillan)

English History.

J. S Lay The English People (Macmillan) Oman Junior Historytof England (Arnold),

Geography.

Syllabus

- I (a) Shape of the Earth, rotation and revolution, latitude and longitude, simple map projections, duration of day and night, seasons
- (i) Outlines of the relief and dramage of the lands and the nature and origin of the chief land frms, including coastal configuration
- (c) The atmosphere Weather and climate Seasonal distribution over the globe of insolation temperature, pressure and rainfall Winds, Ferrels law, Buys Ballots law cyclones and anti-cyclones Climatic regions
- II (a) The world treated according to its major natural regions The knowledge of the principles of physical geography and of the geographical distributions should be applied to the study in outline of the major natural regions of the world
- (b) The influence of his environment on man, his activities his industries, exchange of commodities, communications, growth of towns

III Geography of India m foller detail

Books recommended -

Mackeuzie and Tydeman The World in Outline (Indian Press, Allahabad Re 1)

Herbertson Junior Geography, Oxford University \Pr_{CoS} , Si 6d

Heriertson (F D) Elementary Geography Vol:

L'E trange Junior Course of Comparative Geography , George Philip & Son 32 Fleet Strees, London, 3s 6d

Vorrison Junior Geography of India, Burma and Ceylon, T Nelson & Sons, London, 12 annas

Morrison New Geography of the Indian Empire and Cevion Nelson, Re 1

Indian School Atlas, Oxford University Press, 1s.
Bartholomew's New Indian School Atlas

Books for teachers -

Herbertson Senior Geography (Oxford University Pre s), 3a 6d

Mill International Geography, Macmillan, 12s,

Tar and McMurry World Geography, Macmillan, 59

Chickolm Smaller Commercial Geography, Longmans, 3s. td

Lyde Men and his Markets Macmillan, 2c. Herbertem Man and his Work (Black), 1s. 6d Davis Physical Geography (Guon), 5s. 6d. Mill Elementary Realm of Nature (Murray), 5s

Unstead and Taylor: Essentials of World Geography, Philip, 2s

. Books recommended for general reading for boys:—
High Roads to Geography, Neison
Land and their Stories Blackie
Peeps into Many Lands, Black

IV -VFRNACULAR (HINDI URDU, BENGALI etc.)

There will be two papers each of three bours in cach of these languages one paper will be set in Prose and Un escen, and the other in Poetry and Composition Gram matical questions will be set in both the papers. The ability of the Urdu candidates to read shitast will be tested by mann of a paper set for the purpose.

The following are the text books prescribed -

Hundi

- 1 Ram Charita Manea, abridged by Shyam Sunder Das
- 2 Abhigyan Shakuntala Natak by Raja Lakshman Sinha (in Proce and Verse)

Hindi Selections in Prove and Poetry (Published by Ram Dayal Agarwala)

3 Sankshipt Hindi Vyakerana compiled by Pandit Kamta Prasad and published by Nagri Pracharti Sabha Benares

Or Hindi Grammar by Pandit Madho Prasad Pathak

Urdu

1 Guldasata-1 Adab by P Manohar Lal Zutshi (Indian Press Allahabad).

or

Tuzuk i-Urdu by Muhammad I mail (Newal Ki hore Press Lucknow)

2 Sarmaya i Urdu by M Ahmad Ashraf, Retired Head Maulvi Government Higi School, Allahatad

3 Qawaid Urdu for High S hools by Maulyi Jamal Uddin Haidar

For Shil ast the book recommended is-

Ioshai Jadid (Majmua Kaghzat Karrawai), Part II by M Asmatullah, 2ud Maulvi Government High School Meerut (Lala Kedar Nath Publisher Meerut) 5 annas

Bengalı

- Sitar Vanabasa by Pandit Ishwar Chandra Vidiasagar (Prose)
 - 2 Katha O Kahini by Babindra Nath Tigore (Poetis)
- 3 Mahabharatun ini Katha in Bengali Puts I ind Il by Rujendra Nata Kanji Lal 3 Madun ini ra Lane, Calciutta Rajendra Clandra Chesh 35 Cornuallis Street Calciutta 12 appas each
- 4 Bhasha Bodh Vyakaran by Nakulesh vara Vidyabhushan Re I

Parbat

- 1 Mahahbarata (Gadaparya, Striparya Saupukaparya) -- Prabhakari Company Benares
- Sankshipta Ramavana published by the Superintendent Education Department, Nepal
- 3 Nepali Grammar ov Pts Para, mani Pradhan and Sheshmani Pradhan, Kalimpong

Marathi

Prose-Gadyaratnamala by S G Bapat

- Poetry-(1) Moropant's Rekavalt by Profes or Stidbar Vishon Paranjpay, published in the Air nay Sagar Press, Bombay, and
 - (2) Raghunath Pindit's Nala Imavantisvayambarakhyana only 224 verves, as published in the Navanit by the late Mr. Purasharampant Godbole

Grammar—R B Joshi's Marathi Grammar—Prau dhabodha

Recommended for the use of teachers—Marathi Gram mar by M K Damle (Published by the Induprakash, Bombay)

ukrypi

Karangielo by Naud Shankur,

Kareya Dehan, about 100 pages of the portion containing Nalakhyana

Grammar-Taylor's Guy at Grammar

Uriya

Prabandhamala by M S Rao, pages -115 Jagannathdas-Bhagabata XI Skandha

Telugu

Pross - Nitichen Isca San Ihi by K. Veersalingam Poetru - Phaskarsata Kamu. The whole

Tamil

Tamil Text book (for Group C) published by order of the Director of Public Instruction, Madras by S. P. C. K. Press Vepery Madras

B -OPTIONAL SUBJECTS

1-CLASSICAL LANGUAGES

There will be two papers, each of three bours, in each of these languages the hist paper will be in the prescribed texts and Grammar, and the eccoud paper in Translation, Composition, and Unseen

SYLLABUS

(a) Sanskrit

Paper I (a) Text books (1) Mitra labba (Hitopadesh) and (11) Bhartriban-Nitisbataka

Noves 1 No particular ed tion is prescribed any objectionable passages may be omitted by teachers

- 2 The students should be taught to understand the pas sages with cootext and the substance and to learn the paraphrase 1 e., the symousys of the words a Sans kr , analyses of the compounds Sandhis, and the proce order of the poetry p cess
- (b) Grammar —Simple Sandhis D clension of nouns and pronouns of frequent occurrence conjugation of verbs of frequent occurrence but omitting those of adadi (মহাহি), rudbadi (হুমাহি) Juhrtyadi (স্ক্রীম্বাহি) and kryadi (স্কাহি) classes, in লহু ভাহ, লহু, খিনিলিহু and লহু only

Books recommended in Grammar -

- 1 First Book Sanskrit by Bhandarlar
- 2 R K Banerjee's Sanskrit Grammar
- 3. Sauskrit Frathama Pustaka (संस्कृत प्रधान प्रसाद) by Professor Ram Bihari Lal, D.A. V. College, Cawapore
- 4 Upakramanika (उपस्मासिका) Printed by Khadgavilas Press, Bankipore

N.B -Questions on Grammar emissively should be asked from the pre-cribed books as far as possible and should carry about one third of the total marks

Paper II -- Unseen and Translation -

(a) Selected pas ages from books recommended for rapid reading and from others of equal difficulty for translation into the vermoular of the cardidate, (b) substance of easy passages from the abovementioned books to be expressed in English, and (c) translation of easy English proce sentences into Sankin;

Book recommended for rapid reading -

Kusuma mala (part I) by V S, Apre.

Book recommended for composition -

Sanskrit Teacher by K. P. Trivedi

A.B.—Sanskrit most be written in the Devicagari character.

(b) Arabic

Prescribed cour e-

Majanil Adab by Louis Cheitho, published by Auwar Ahmadi Press, Allahabad, or Sallum ul adal (published by Bai Sakeh Yun hi Gulab Singh Mafid i Am Press, Lahore) Grammar—Mabadul Arabia مائورية والمناسبة والمناسبة والمناسبة المناسبة والمناسبة المناسبة الم

Rook recommended for rapid realing المرازح البراق Ma darijul-qiraat, published by Mujtabai Press, Delhi Book* recommended for the use of teachers :-

Anglo-Arabic Stories, by Maulyi Abdul Bashir Muhammad Osman Ghant, A. S. Ahmad-ur-Rahman, 41, Kalta Bazar, Dacca, 10 annas.

(c) Persain

Prescribed course -

(1) Text-

excluding حدال سعدي and صعدي (excluding

ر بعدیه ذاک مین و حوالعاتید ده مین همان (مکار که تقریم Anwar Subeib, from علیمالتنانی مع آجار داستان دادشلیم omitting from میش ارائکه half line).

Ruqaat Alamgırı —

Poetry --Bostan, the Syllabus for 1921 (excluding 6, 7 and 8), Qasaid Saadr, Qasaid heginning with. (ا) ایهاالفاس حیال حاله تن آسانی نیست

[•] In connection with the books recommended for the use of teachers in this prospectus, it should be noted that there are in addition a numter of books approved for the use of teachers greatly (vale tat of books approved for the use of teachers of Anglo Vernacular and Vernacular Schools, dated the Sitst July, 1916, and its supplements issued annually.

(11) Grammar-Qawaid Farsi by Jalaluddin Ahmad Jafari, published by Anwar Ahmadi Press, Aliahabad or Qawaid Farsi-Amali وراعد نارسي عملي by Maulvi Ishaq

Alı of Allahabad University (Indian Press, Allahabad) Rapid Reading .- Farm Jadid, Part II (2nd edition), by Manlys Saved Muhammad Als Irani, Professor, H E H Nizam's College Hyderabad, Deccan, or المرادش Ayar Danish as published by Anwar Ahmadi Press.

Allahabad. Students who offer Persian are required to have such a knowledge of the Etymology of the Arabic language as will enable them to explain all Arabic words and phrases which may occur in the text-books and in the books recommended for rapid reading in Persian.

Note -Persian words must be written in the Persian character.

(d) Latin.

Two papers will be set as follows .-Paper 1 - Prescribed Prose and Poetry

Text-books -

Prose - Casar De Bello Gallico, Books IV and V.

Poetry.-Virgil Aeneid, Books II and III

Paper 2 -Grammar, Composition, and Unseen.

Paper 1 shall contain passages from the prescribed books together with questions relating to subject matter and language.

Paper 2 shall include (a) questions on Grammar, (b) sentences for translation into Latin, (c) an easy continuous

applicances.

passage for translation into Latin, and (d) an easy naseen passage for translation into English, a vocabulary of the less familiar words being given

II -- COMMERCE

The examination will consist of two papers -(a) one paper on husiness, or Commercial Practice and (b) one paper on either (i) typewriting or (ii) book keeping.

Norrs -1 In type wasting -theory paper of one and a half hour a duration

2 Book keeping paper of two and a half hours duration

The following is the Syllahus in each subject —
Business or Commercial practice—Office routine—
Drafting simple business and official letters, preparation of
telegrams and cablegrams, including a knowledge of simple
codes Docketing filling, copying and despatch of letters
Ordinary postal regulations, use of postal forms, such as
Money Order, V P P Acknowledgment, Registration and
Insurance forms Post Office Saving Bank Accounts
Telephone Simple duplicating and other labour saving

Meaning of ordinary commercial terms and abhraviations Preparation of simple commercial documents, incoments, since as indents, invoices, bills of exchange, promissory notes, statements of accounts. Nature and use of Bills of Lading and railway receipts Simple banking transactions, involving the nature and use of cheques, depositslips and pass hocks. Time allowed—24 hours

Type-writing —There will be no practical examination on the Type writer, but only a theory paper involving questions on—

- (a) the mechanical construction of the type writer .
- (b) care of the machine.
- (c) display of matter, including headings and titles, centering, contractions and abbreviations, hyphenation, punctuation, stencil cutting,

adaptation of one or more characters to represent characters not given on the keyboard, corrections, erasures Time allowed—1½ hours

There will also be a second paper, consisting of Type-copying of three manuscripts Time allowed—1 hour.

Book keeping — Elementary theory of double entry book keeping Freparation and keeping of the Cash Book, Bonght and Sold Books, Returns Books, Bills Receivable and Bills Payable Books Journal and Ledger, recording therein simple transactions involving purchases and sales, bills receivable and payable, real, personal, and nominal accounts, such as rent salaries, interest, discounts, bad debts, and depreciation. Drawing up the Trial Balance Closing the Ledger, and prepring Trading and Profit and Loss accounts, and Enlance Sheet, Simple bauking transactions involving the nature and use of cheques Deposis slips, and Pays Book, and preparation of Bank Reconciliation Statements The nature and use of Bills of Exchange and Promissory Notes Petty Cash and Imprest Systems

III -SCIENCE (PHYSICS AND CHEMISTRY)

No candidate shall ordinarily be admitted to the examination in this subject who has not taken the optional science course in Classes VII and VIII

The examination will consist of two papers, one in Physics and one in chemis ry, each of three hours

Physics Stragge

Definitions of Physics and Chemistry Measurements of length area volume mass and weight, the Balances Density, specific gravity Principle of Archimedes The three states of matter Simple barometer

Heat -Expansion of solids liquids and gases, tempe rature thermometers melting and boiling points conduction convection and radiation. Unit of heat spec fic heat change of state latent hent

Light - Rectilineal propagation of light Reflection refraction mirrors simple lenses and prisms. Position of object and image

Magnetiem -Attraction and repulsion magnetization terrestrial magnetism magnetic meridian. The compass

Electricity -Production by friction Attraction and repulsion The electroscope conductors and insulators

A simple cell magnetic an I heating effect of a current

Chemistry

Common properties of matter-Hardness porosity brittleness solid liquid and gaseous states Change of state Melting and boiling points Crystalline shape Effect of heat on common hings Solution in water The above to be studied with NaCl KNos CaCos NasCos CuSo, FeSo, ZuSo, Fe Zn Sn Mg Pb Hg and P

Solution melting evaporation distillation filtrationsolution in water and alcohol Slow and rapid evapo-

ration saturated solutions

Crystallization studied with solutions in water and melted sulphur D stillation of water Elementary and compound substances Metals and non metals Chemical symbols chemical action the laws of definite and multiple proportions atoms molecules atomic and molecular weights valency relation between equivalent and atomic weight Simple formulae and equations

Study of air-Rusting of metals oxidation active and mactive gases in air Burning of phosphorus Meaning of combustion slow combustion studied with Fe Mg P

Oxygen gas-Prepared from oxide of Hg and KClos Important properties

Preparation and properties of the following -H N \H. Cl HC . HNo. Co.

S.udy of water - Action of steam on red hot iron filings. Action of Na on water - Action of Mg on water. Electrolysis of water.

Norm - The detailed course given below indicates the minimum amount of practical work required to be performed by s'udents and suggest's a method of treatment of the syllatins for the guidance of teachers. They may substitute other experiments of equal official discating adults. Practical work head be co-ordinated with the theoretical work and follow it consecutively as for as possible. The practical exceptions to them the performant plant he exception and artifacted to be as as can be arranged.

The use of steacils in answering question papers in science is not allowed.

Four years' course in Science

N.B.—Experiments macked by an asterist in the syllabus for claims VII and VIII may be done in class IX it classes VII and VIII are large, familities for practical (work limited, or the time table in Science restricted topinly 3 periods of § host each per week

FIRST YEAR.

(Class VII.)

Babje-t	Detailed, syllahus.	List of experiments which should be done by the papils		
Length .	Units in Entish system and Metric system Calculations Messurement of curved lines Eules for the length of the cucumierator of a curvel.	Find the number of cm. 13 mch. 2 Measure the circumference and domneter of a circle and to find the value of		
Area . (Units in Briash system and Metric system Rine for srea of 5 rect sage Califolishons. Use of squared paper to find the area of figures other than rectangles. Formula for the area of a triangle.	2. By squared paper prove the formula for the area of a rectangle 4 *By squared paper find the area of a triangle and irre- gular figures		

Subject	Detailed syllabus	List of experiments which should be done by the pupils
Volume {	Units in Entirch and Met- nic system Rule for the volume of a rectan- gular sold Calcula- tions. The graduated cylinder. The Buretts	5 Use of graduated cylinder to find the volume of large solels and the capacity of large vessels. 6 Use of briefites to find the volumes of small solels and the capacities of small bottley
Weight	Distinction between mass and weight. Units in British system and Met- no system. The ha- lance	7. Simple extresse in weigh- ing, e.g., find the number of gm in Lounce
Dansity {	Definition Galentistions	8. Find the density of solida, being given rectangular grees 2. Find the density of com- mon hamids by mesua of burette
Heat	Expension of solids, liquids and seess by heat. Construction of a thermometer Explanation of Centigrads thermometer	10 Simple cheevations with the thermometer, e.g., find the boiling points of water and alcohol

(Class VIII.)			
Subject	Defailed syllabus	Last of experiments which should be done by the pupils.	
Heat	Companion of Centigrade and *Fahrenbeit ther- memeters Calculations	1. Observation with thermo- meter, a g , cooling curve for water.	
Area	Formula for the area of a circle Calculations	2 By means of squared pa per cr by wrighing find the ratio of the area of a circle to the area of the aquire on its radius	

Subject	Detailed syllabus	Last of experiments which should be done by the the pupils.
Vo nme	●Formina for the volumes of sphere and cylinder ◆ Calculations	2 "By weighing "similar" cubes spheres and cylinders remly the formula for the values of cylinder and sphere (The experiment may also be done, but less accurately by the displace ment of water)
H.at	Making point of ice, Mela ms point of any solid Conduction of heat Companison of the conducting powers of communication of heat Rad ation of heat	4 Find the melting point of periodic wax or mightalene
Hyd osts- ucs	Relative dans ty for speci- fic gravity) Princep a of Arch mades Deter muss tax of relative dans ty by Archimedes Princ ple Caleniations	Determ nation by Arch medes Principle of the relative density of— 5 (a) bodies which float in water 6 (5) bod as which sing in water
Chemistry	Defin hous and common properties	Measurement of relat ve hard ness of different substances.
	Solubility Influence of temper ture on solubi	To find out which of certain substance are soluble in water e.g lime salt mar bis an a cohol a g, war, salt
	Crystallization Water of exystellization.	From solution From mo ten
	Mechanical Engineer	Filtration Separat on cf sand and salt. Separation of mon and hiphur (magnet Chancol and mine by solu tion and filtration
	Chemical compounds phy sical and chemical shangs	Heating sal sugar sand sto charcoal and mate from and su phur from in solu bom of copper sulphat.

TEIRD AND FOURTH YEARS

(Classes IX and X.)

Classes IX and X will have six periods of Science per week—for at least 27 working weeks, this gives a total of 162 periods in Class IX

Subject	Dets:led syllabus	Minimum list of experiment which should be done by the pupils individually		
Heat	Unit of heat Quantity of heat Calculations Specific heat Litent heat Litent heat of vaporisa- tion	Determination of specific heat of solids Latent heat of fusion of ice Latent heat of vaporisation of water.		
Chemistry	Effect of dissolved sub- stances on houses point Distillation Purification of water	To find B P of solutions of calcium chloride Solution of differing strengthe To find tobes bore corks, set up apparatus for distillation and find B P before and after distillation		
	Elements and compounds Metals and non metals properties.	To examine the elements sul- phan, copper lead mercury, rine. To examine the oom poonds, ferrors sulphate copper sulphate lead cade, mercury oxida and regain the claments		
	The atmosphers Combustion, active and inactive air	Burning a candle in a hell jat Hepeat with sulphur phospho tus To measure the propor tion of air need up when a substance hurns in air		
	Rusting .	To abow from will not rust in dry air To measurathe air used up when aron rosts in air		
	Increase in most in rust ing and burning	To show increase in mass when magnessium and iron burn in air and when iron ruits in air —when a candle burns in air		

High soutors			
Eubject.	Detailed syllabus	Minimum list of experiments which should be done by the gupils individually.	
	Explanation of above Introduction of terms 'Oxygen' and 'Nitro gen Oxygen'	Preparation from menutine onde and potassium chlorake in small quantic es and on large scale from manganese dounde and potassium chlorake, its pre- To show loss in mass when pota- sium chlorate is heated.	
	Matals and non metals Oxids Nurogen Its use in the atmosphere.	Their basic and acidic properties Properties, to find accurately percentage of mitrogen in air by pyrogallic acid. (Lecture room)	
	Wa'er not an element	Action of sodium on water. Ac- tion of megnesium on boiling water Action of steam on troa Esamination of oxide of from formed Increase in miss Comparison with from 19th;	
	Resume of above Intro duction of term." Hy drogen.".		
	Preparation of Hydro- gen and its proper ties.	From sine and sulphirms and What happens to the sine. What happens when hydrogen burns in air Explosion of hydrogen with air Electrofysis of water and its composition by solumn Action of hydrogen on copperation when heated. (Lecture room)	
	Carbon	Properties and varieties	
	Demonstration lesson- Carboni acid gas Chalk	Fermation when earlien or ear bonnacous matter burns in air Effects of acids on chalk Exa ministion of the gas, properties of gas obtained by effect of ministion of him, difference between properties of chalk and hime, loss in mals on heat mights he	

Subject	Defailed syllabus	Minimum list of argenments which should be done by the pupils individually
Light	Resume of above Ani mal fod plant had for the plant with the plant was of reflex on Ima Reflection of high the process or plant was of reflex on Ima Reflection of high the process or plant and the plant was of the plant with the plant was of the plant was of light Laws of lefter of plant Laws of lefter or plant, plant of law of laws	Formation of oxygen by plants 3 Vernitation of the "Angle ' law of reflection at plane meror 2. Finding the focal length of concavaments 2. Finding the focal length of concavaments 4 Tracing the path of tay of high through a prism 5 Pecul length of lens 6 Vernitation of the law of magnetic attraction and repul sion sion 3 Making a magnet
- 11	repulsion. Magnet ration and da magnetizat on The carth as magnet Magnetic meridian	8 Demegnet stog a magnet 9 Marking a N S line
Frictional electricity	The compass Production of electricity hy fir tion Electrical attraction and repulsion Two kinds of electrifica tion The electroscope Conductors and insula tors	10 Electrification of rode of glass eboute etc 11 YernGestion of laws of attraction and ropulsion 12 Chargung at electroscope 13 Finding by means of the electroscope whether bodies conduct or insu- late
Current electri	A simple cell Magnetic affect of a current Electrical hell, electric lamp Very simple explanation of the telegraph	14. Making a simple cell 15 Finding by experiment the mignetic effect of a correction a magnetic needle

Note —In class X time is left for revising the whole course in preparation for the High School Examination

(b) Books recommended for use in chemistry — Chemistry for Indian Schools for Staudards IX and X, by E. G. Hill, Professor of Chemistry, Muir Central College, Allahabad Indian Press, Allahabad Re. 1

Physics and Chemistry for Secondary Schools in India. Parts III and IV in one Volume, by E. G. Hill and A. H. Mackenzie, Macmillan and Co., 1918 Re I-S.

*Books recommended for the use of teachers -

Practical Chemistry volumes 1 and 2, for Standard VII of High Schools in sity Press, Rombie Bombay Presidency by H. E. H. Pratt 6 annas.

The following books in Physics are recommended for teachers' reference library -

A class book of Physics by R. A Gregory and H. E. Hadley, Micmillan and Co, Lessons in Science by R. A Gregory and A. T. Simmons Macmillan and Co. Re. 18-0

A course of Physics by C. H. Draper Popular and Natural Philosophy by Ganot

IN-AGR'CULTURE (AGRICULTURAL BOTANY).

The examination will consist of two papers of three hours each, and a practical test. The first paper will be on the subject-matter in the syllabus up to and including sub-section 5 — Soil, and the second paper on the remaining portion.

Syllabus.

I Typical Plant Mustard or Bean—Students, should be supplied with entire plants dag up and the roots freed from soil by washing

A.- The root arrangement of branches, origin of rootlets, root hairs, root cap, the woody centre as seen in cross-sections

[&]quot;In cannest on with the books recommended for the use of teachers in this Prospectus it should be noted that there are middlines another of books approved for the use of teachers generally to do its of books approved for the use of teachers of Anga Vernaettur and Vernaettur Schools, dated the Six July, 1916, and its supplements asserts annually)

- B—The shoot Cylindrical stem, nodes and internodes, apex and bad, appendages of two kinds, origin of appendages woody centre as shown in the cross section
- C —The flower the parts, successive appearance in the inflorescence
- D—The fruit development from the pistil, ripening accompanied by withering of the plant.
- 2 The Seed Bean-
 - A -Position in, and attachment to, the walls of the fruits
 - B -Parts of the seed dissected out
- C Comparison with the seeds of the gourd
- 3 The seed and Germination -
 - A -Conditions necessary for germination -
 - (1) Water-Absorption, by dead and live seeds absorption from water, moist earth, damp air; amount of absorption, method of absorption
 - (2) Air and oxygen-necessity of air, method of entry into embryo
 - (3) Heat—comparison of germination at different seasons
 - (4) Light-not necessary for germination
 - B-Respiration of germinating seed absorption of oxygen, evolution of carbon dioxide, loss of weight
 - C -Heat produced by germination
- D -- Food material stored in the seed starch, sugar, glutin oil, digestion of these and the absorption by the embryo, sufficiency of these for the support of the embryo, during germination only
- E —Emergence of the seedling difference in behaviour of the cotyledons
- 4 Roots and their work-
 - A -Tap and the true root-adventitious roots, cuttings and layers

- B Direction of growth—tap, secondary and tertiary roots, influence of moisture.
- C .- Functions of the root --
 - (1) Absorption of water; root pressure.
 - (2) Absorption of soluble matter from the soil.
 - (3) Fixation of the plant.
- 5. Soil—What is soil? Different kinds of soil, recognition of different kinds of smls in the field and from samples in the class-room, formation of soils, weathering, local and transported soils (To illustrate the transportation of soils the pupils should be made familiar with the formation of the soils of the Gangetic plain) Effect of tillage.
- 6. Whiter in soil—Capillary movement of water in soils, conservation of moisture, loss by evaporation, heaviour of different soils in relation to water, relations of the ordinary operations of cultivation to the conservation of moisture; effect of tillage upon the conservation of moisture and on the supply of plant food, other methods to be followed for the conservation of moisture in soils, wells, percolation and spring, the principles underlying their construction, different water requirements of the various crops, local methods of irrigation, downward movement of water, drainage.
- 7. Rainfull Rainfall of the United Provinces; its distribution as affecting the system of cropping.
 - 8. Leaves and their work-
 - A -Structure of the leaf-
 - (1) Parts of the leaf.
 - (2) Shapes, simple and compound.
 - (3) Veins connected through mid-rib and petiole with the wood of the stem
 - B -Function of the leaf-
 - (1) Formation of starch in presence of light.
 - (2) Absorption of carbon-dioxide.
 - (3) Re-absorption of starch.

- (4) Respiration carbon-dioxide evolved
- (5) Transpiration
- C -Successive appearance of leaves leaf fall
- 9 Stems and their work-
 - A —Forms of stems—length of internode, erect climbing and underground stems
- B-Structure of stems-radial or scattered bundles secondary thickening annual rings, bark
 - C Elongation of stems-apical growth buds
 - D -Branching of stems-position of the laterial buds
 - E Function of stems -- arrangement of leaves passage of food material and water
- 10 Flowers and their work -
- A Essen ial and non essential organs
 - B Pollmation
- C -Self and cross-fertilization monoceism, dieceism transport of pollen
- D -Function of the non essential organs
- E Growth of the ovule
- 11 Fruits and seeds -
 - A -Ripching of the fruit
 - B -The commoner forms of fruit
 - C The commoner forms of seeds
 - D Dispersal
 - 19 Tupes of plant-
- A -Free living saprophytic and parasitic plants
 - B -Lower forms of plants -
 - (1) Alga spyrogyra
- (2) Fungus mould
- (3) Fern
- 13 Interdependence of plants and their surroundings as illustrated by the local crops and the climate of the district

Note - Candidates will undergo a course of pract cal work in connection with the above syllabus

Note for the guidance of teachers in the carry ng out of the practical work in connection with the syllabus in Agric liural Balany

All specimens required for demonstration purpose should be abusined before each lesson period so that the pupil's time is always properly utilized during each fession

Special note-book should be kept by each pupil for practial work neat sketches should be made and concre descrip ions entered therein. These not knoks must be kept properly up to date and ready for insjection by the Inspector of Examiner.

As a general rule the pupils are to be supplied with individual specimens for personal examination and d scripum. This particularly applies to paragraphs 1 and 2 (wife spliabus)

Caver s Fiant Biology published by Messrs W R. Clive, University Tutonal Pres, "o High Street New Oxford Street London W C, is recommended for the teacher only and the numbers attached to the experiments detailed below which are to be performed by the pupils refer to the number of the experimen s given in that hook

8A.—(1) Vide syllabus, experiments 20, 22, 23—80, 40, 43, 50
(11) Vide syllabus, experiments 54 77 79
(11) 96, 97
3B— , 50—83
3C— , 84

103-108 109, 111 120, 121 143 144

3E.—Compare emergence broad bean, dess sem, and easter (or cotton) plant

4B -- Experiment 165-167, 169-172

3D-

4C-(1) Experiments 203 205 For demonstration only 206-208 4C —(1) Experiments 203, 205. For demonstration only 210,

8A -(111) Experiments 224, 225, 226, 227.

8B -(1) 230, 232, 234.

(11) , 248, 250, 251.

(iii) Experiment 241

(1v) Experiments 276, 277.

(v) .. 278, 284.

Throughout, and especially in such section as no. 11, the teacher should only explain examples of common plants growing wild or enlitivated in the neighbourhood of the school.

When section 4C is reached, lessons in section 5 should he started One-half of the lessons in each week to he devoted to sections 5, 6 and 7, until this portion of the syllahus which deals with certain elementary principles of agriculture is completed, while lessons on sections 8, 9, eto are to follow immediately on the completion of 4C.

The following is the list of apparatus, etc, showing the minimum requirements for the above syllabus.

Nore -This list has been prepared for a class of twelve students working together. If more students have to work at the same time the number of articles to be used by each student should be increased proportionately.

If there he a doubt as to the name of any article, Messrs Bard and Tatlock's catalogue for 1906 should be consulted --

. Name of article	Quantity	Aumber in Baird and Tailook a catalogue.
Chemical balances with gramme weights. Beaker, 8 seits 1 (60 c o 100 6 (455 o d). Aspirators, 2 litries or bigger. 2 without tabulares 2 with 1 whothers 2 with 2 tabulares 2 with 2 tabulares	4 dozeni 2 "	120 993 1,108 1,004 1,005 1,012

V - DRAWING

The examination will consist of three papers of two hours each

SYLLABOR

Freehand Drawing from the flat - To copy to an enlarged or reduced scale

Model Drawing - Drawing of common objects or from casts shaded, and the following geometrical solids --

Cubes, prisms, cylinders coues, both right and oblique right and oblique sections of there solids wedge sphere

Geometrical Drawing —(1) The theory and use of instruments, especially of the protrictor and Marquoise scale

- (2) Plain block-letter writing
- (3) The whole of practical plane geometry
- (4) Drawing to scale, viz, scale of chords diagonal scale, plain scale, comparative scales (to be done in ink)

VI - MANUAL TRAINING

The examination will consist of one paper of three hours in Drawing and a practical examination of four hours in Voodwork

- (A STELLIBUS
- (1) Woodwork-
 - (a) A series of models graduated in respect of the tool manipulations involved to be made in wood from working drawings (drawn in plan, elevation sidewise and conventional isometric projection) or from a given pattern in wood the construction of the models to involve the use of one or more of the following tools: Jack Plane Try Square Marking Gange, Marking Knife, Smoothing Plane, Tenon Saw, Bevel Screw Driver, Firmer Chisel, Hammer, Mallet, Bradawl, Nail Panch, Compass Firmer Gonge, Gimlet Frame Saw Spoke Snave Erice and Bit, File.

The following joints at least should be included amongst the models -

Half-lap Housing, Mortise and Tenon, Half lap Dovetail, Eox-Dovetail, Edge Dovetail, Bridle

(b) The care and maintenance in good working condition of the abovementioned tools, excluding the esting and sharpening of the saw

(2) Drawing-

Drawing in plan, elevation, and side-view of all models in the course and in conventional isometric projection of those of a rectangular shape.

Notz.—I A scheme draws up on the above lines is given below feathers need not keep streetly to the particular model mentioned in this scheme, but it any changes in the models are made these should not involve changes in the new tool amongstations employed. The course should, if possible, be commenced in class VII

2. Attention is invited to suggestions for teaching of Manual Training contained in Director of Public Instruction's ci cular no 2 of 1917 19 *(b) Books recommended for the use of teachers -

The Teacher's Handbook of Seoid, by O. Salloman. Ge orge Phillip & Son. 6s

Manual Instruction, Woodwork, by J C Pearson. George Phillip & Sons 6s

McDougall's Light Woodwork, ly David Thomas McDougall's Educational Company, London 1s

The Scholar's Woodwork Class book, by T W Berry

Cassell & Co. London 1s. Practical Drawing, by T S Usherwood Macmillan

& Co 28 Educational Handwork-Junior course by J L Martin

and C V Manley Blackse & Son 1s 6d

Educational Handwork-Intermediate course by J L Martin and C. V Manley Blackie & Son 1s 6d ,

Educational Handwork or Mannal Training, by A. H. Jenkins. University Internal Press Burlington House, Cambridge

The 'Self-help' course of Woodwork Exercise, by E J. Andrews Charles and Dille, 10, Paternoster Square, London 2s net

[&]quot;In connection with the broks recommended for the use of teachers in this I respectus, it should be noted that there are in addition a number of books approved for the use of teachers generally (v de list of books approved for the use of feschers of Anglo-Vernacular and Vernacular Echool dated the Sist July, 1916, and its supplements issued annually).

VII -- A MODERY EUROPEAN LANGUAGE

French.

There will be two papers of three hours each The firs, paper will consist of Selections from the prescribed Texts and Grammatical questions thereon The second paper will consist of Unseen Translation and Composition

Books prescribed-

Ed About -Le Roi des Montagners.

Macmillan a Edition (Stenmann a Series)

Du Camp -La Dette de Jen (Cambridge University Press)

Perrault -Contes de Fees [Edited by Fasnacht (Macmillan).] Grammar recommended-

Franch Grammar (Sonnenschein's Parallel Grammar Series),

Norm.-Viva Voce Examinat on has b en dropped, for the presen

VIII -DOMESTIC SCIENCE

The examination will consist of two papers. The first paper will contain questions on Physiology Hygiene, Household Management Home-Anreing. The second will consist of the practical examination in Sewing to be held at the same time as the examination to written wirk. There will also be an oral test in First Aid and Home-Auritog.

Syllabus

As a basis for the teaching of Hygiene and Homebursing there shou'd be a preliminary simple treatment of the following topics of elementary Phys clogy —

The human skeleton, the organs of digestion the circulation of the blood the oervons system, respiration

1 -Hygrene

Norr -- Great importance thould be attached to practical work wherever the subject admirs of this

Air - Composition of air, ventilation, importance of pure air, impurities of air, diseases caused by impure air

Water—Composition of water, quantity of water required, source of water-supply, springs, deep wells, sur face wells, rivers, tanks, how water is polluted, how to purify water, boiling and filtering

Fo d - Composition of food, composition of good diet and its importance, preservation of food, cooking of food, drinks and condiments

Personal Hygicae - Clevaliness of body (bair mails, teeth, etc.), clothing, exercise, importance of temperature, the use of pan, opium, and other drugs, spitting

Precautions against Discoses - Infectious diseases (small por measles, and diptiteria etc), tuberculosis, enterio fever, dysectery and districta, cholera, 1 ch, leprosy

2 - First And

Roller bandage, figure of eight as applied to kiee, elbow, finger, ear, bandage for eye, note, chin, many tailed handage for clest. Meeding of different kinds, how to stop bleeding, drowing, burns, stalds, brunces sprains, broken bones, dislocation, carrying injured people, fainting, sanstroke, bysteria, epilepsy, sufficiation, foreign bodies in eye ear, note and throat, buttee of mad dogs, signs of maddiess in dogs, snake bites stings

3-Home-Nursing

Nore —hone of the work is to be gurely theorel cs! Practice must be given in every 50 at which sllows of practical work

Room -Bed, bedding, furniture, light, warmth, ventilation.

Nurse - Health, dress duties and qualifications of nurse.

External Remedies -- Poultices; plaster; fomentations, ice, baths--hot and cold, temperature of baths

Food -Kind of food and preparation, way of giving

The Siek Room.—Administration of medicine, pulse and temperature charts—bathing, changing of garments and hedding

Injectious Illness —Precautions during illness, disinfection of room, clothing, and hedding after illness use of disinfectants

Contale-cence - Occupations, visitors rest, sleep and food

4 -Circ and Training of Children

Food sleep, exercise play, clothing cleanliness, surrounnings

NOTH —As an indication of the ecops and standard of instruction in Bygens and Home Northing teachers are referred to sections II, III and IV of P rocall and Domestic Hygens for the School and Home, by Mrs Harold Handley (Blu Sahh M Galb Emph & Sons, Calcutta), also to Indian M must of First And and Indian Home Average published by the Indian M country of the St John's Ambelance Association (Thacker, Spink & O. Calcutta)

5 - Hous-hold Management

A-Choice of House Furniture and Decoration Distribution of rooms Cleansing and care of house and furniture Disposal of refuse and sewage

B-Care of the kitchen

Preparation of simple food

Two of the following groups -

- (1) preparation of rots, rice, dal, and tarkari.
- (11) preparation and care of milk
- (111) preparation and care of meat. (One dish only required)

C -Duties of mistress of household

Proper distribution of daily activities Accounts and budgetting of expenditure

6 -Sewing and Cutting out

Sewing.—Each candidate should select three of the following groups. A good standard of skill will be required in the various stitches required in making up garments and in mending worn articles of clothing.—

- (a) To cut and make up coat (achkan) or pyjama or shirt (kurta) or waistcoat for a man
- (b) To cut out and make up kurts or blouse or skirt or petticeat or pysams for a woman
- (c) To cut out and make up frock, or bonnet, or pyjama or bands for child
- (d) Drawnthread or crewel work or English embroidery or chikan work or sulme siture
- (e) Knitting of stockings

INTERMEDIATE EXAMINATION OF 1926

ENGLISH

There will be one paper on the pre-cribed Pros. course and a second paper will be set on the Postry course, and in each paper one question will be set on 'Unseen' passages.

In place of the Unseen Prose passages candidates who offer English as their mother tongue will be required to answer questions on supplementary prescribed texts

A third paper will include (n) translation from a vern nacular into English and (b) a narrative or descriptive piece of composition in English. In the case of candidates who offer English as their mother togue, the third paper will consist of an Essay together with questions on English composition and on the history of English literature from 1500, as in Hudson's outline History of English Literature (Bell & Co.)

Norm.—I In the case of books pre-cribed for detailed study, candidates will be expected to show a cose familiarity with the text, and including meaning of words, construct on of scatteres. In oresis and other allusions, as well as knowledge and understanding of the subject matter. They should be able to indicate contexts and to praphrase and septims any difficult para ages in impleand correct English.

3 In the case of books presembed for general study, d tailed how ledge of the text will got be required, but candidates will be expected to show that they have read the coure with intelligence and with some appreciation. A specimen Question Pag r on the books prescribed for general study in appended.

Bucks prescribed -

Prose -(a) For detailed study-

Helps—E- ays written in the intervals of business

Ruskin—S'same and Lilies from which boily the following lectures are pre-cribed —" King's Treasuries" and " Queen's Gardens."

(b) For general study—
Dickens—Tale of Two Cities
Tagore—Hinngry Stones an 1 Other Stories

Poetry(a) For detailed study—

Browning—A Grammarian's Funeral

Browning—A Grammarian's Funera
Keits—Ode to a Nightingale.

Tennyson-Sir Galahad'

Coleradge—Ancient Mariner.

(b) For general study—

Shakespeare - Merchant of Venice.

Tennyson-The Lotes Enters (the Choric Song excepte 1).

Crossing the Bar

'Ring out Wild Bells."
Keats-St. Agnes Eve.

Byron - 'The Defeat of Sennacherib."

There may be none of

Beauty's Daughters. Shelley -To Night.

Newman—Lead, Kindly Light.
Whittier—The Eternal Goodness, stangas
10 11, 18, 17, 18, 19, 20
Tagore—Three poems from Gitanialle

viz.,

35.--" Where the mind is without fear
and the head is held high."

45 - "Have you not heard his silent steps?

43-"You came down from your throne and stood at my cottage door"

Supplementary prescribed texts for candidates whose mother-tongue is English --

Prose and Poetry — Charles Lamb, Prose and Poetry
(Clarendon Pr. 23, Oxford).

Dunu's Selections from Tenny

son (Oxford University Press)

Nore -(a) H if the total marks will be allotted to the portions for detailed study, 30 per cenf to the portions for gen ral study, and 20 per cent to Uniscon passages and Gramms:

- (8) Grammatical questions will be asked, including Parsing. Analysis the Sequence of Tense and Conversion of the Direct and Indirect forms of speech
- (c) The attention of candidates is drawn to the fact that examiners have been in tructed to deduct marks for maccuracy in English

APPENDIX

SPECIMEN PAPER

ENGLISH TEXT

Portions for general tul-

 $B-\Pi_1$ is presumed that there will be at most three questions on this portion in the grote space and three in the poetry paper. The following are intended only as spoom in softhekind of questions which should be expected.

Examiners should give a wide choice of questions, which should be of a general nature

TYPES OF QUESTIONS

I Poetru

A - Shakespeare - Merchant of Venuce

1 -Estimate of a charicter

eg - Different views have been taken of the character of Bassanio. He has been called 'n downright fortune-hunter'

If you agree with this description, give your reasons, referring to incidents in the play in support of each point you mention. If you do not agree, state with reasons, your own view.

2 -Intelligent description of a scene or meident

eg,-(a) Give a summary of the arguments used in the trial scene.

(b) What characters appear in the scene in which Ba-samo makes his choice * How would you arrange the actors, furniture, etc. for this scene *

3 - Familiarity with the plot

eg —In what way are the casket story and the story of Shylock's bond brought into connection?

B - O'her peoms

- i -Relation of the story of a narrative poem
 - eg -Either-
 - (a) Relate in your own words the story of the destruction of Scinacherib

~

(b) Bring out the meaning of Tagore's peem
You came down from your throng and stood at
my cottage door"

2 - Assignment of striking passages to the poems in which .
if ey occur

 $e\,q$ —To what poems do the following lines belong? By whom were they written 9

(a, Wrap thy form in a mantle grey

Star inwronght 1.

Blind with thine hair the eyes of Day Kiss her until she be wearied out

Then wander o'er city, and sea and land Touching all with thine oniat wand

Come long sought !!

(t) Oh why with thou affright a feeble soul? A poor weak palsy stricken churchyard thing Whose passing bell may ere the indugible toll Whose prayers for thee each morn and evening Were never mast d. t.

3 — Appreciation of beauties in language and rhythm eg — a) Quote or refer to three passages from the poems for general study (excluding Shakespeare) to illustrate...

- (a) Sound echoing sense
- (b) Colour in words
- (c) Musical language
- (b) Re write the following passage in verse -

They saw the gleaming river scaward flow from the inner land far off three mountain tops three silent pionacles of aged snow stood sunset flushed, and, dewd with silvery drops, up-cloud the shadowy pine above the woven copee.

4 — Understanding of the broad differences of form which

- 4 Understanding of the broad differences of form which distinguish the virtuous poems
- eg —From the poems you have read in your course can you mention any outstanding points of difference in subject or form between the poetry of Keats and that of Tagore *
- 5 Explanation of any allusions which may be of importance for the understanding of the whols poem
- eg —Who is the speaker in the ret lines of the Lotos Enters.

II -Prose

1.-Estimate of a character.

eg-(a) Contrast the characters of Carton and Stry ver

(b) State what you know from the reading of your course of any three of the following -

Cowley, Moliere Claude Duval, Sir William Petty, Halley, Boyle, Wren,

(c) Upon what characters does the humonr of the story in the Tale of Two Cities depend °

2. - Subject-matter

- eg-(a) What developments in Science took place
 - (b) Compare social conditions in England as described by Macaulay and Dickens
 - (c) Compare the condition of women in England in 1685 with that of the women in India at the present time in respect of education
 - (d) What, according to Dickens, were the causes of the French Revolution? Illustrate your answer by reference to incidents in the Tale of Two Cities.

(e, Do y u notice any change in Dickens' attitude towards the French populace in the course of the Tale of Two Cities?

3.—Appreciation of literary characteristics

eg - Illustrate from the chapter which you have read the chief characteristics of Macaulay's style.

CLASSICAL LANGUAGES.

I - Sanskrat

There will be three papers the first on Poetry and Drama the second on Proso and Unseen, and the third on Grammar and Composition

Paper I - Poetry and Drnmn-

- (a) (1) Raghuvamsha, Canto XIII
 - (11 Bhatti Kavya Canto II
- (b) hakuntaln Act IV

Norse —1 Students are expected to explain in Sanskirt selected passages by giving the context, synonyms of the different words, and analysing compounds where necessary and adding the purport

No questions purely on Prakrit shall be seked

Paper II-Prose and Unseen-

- (a) Prose-Dasha Kumara Charita विश्रुत चरित
- only
 (b) Unseens-(1) Rama Kutha Manjari, published
 by Bharat House Lahore
 - (11) Ashtapushika by Nilkamala Bbattacharya

Nore —Easy passages from the ebovementioned books and similar passages from other similar books should be set for translation into English

Paper III -Grammar and Composition

- Books recommended —

 1 Apte's Guide to Sanskrit Composition
 - 2 Kale's Sanskrit Grammar
 - 3 Vidya Bhushan's Sanskrit Grammar

In addition to the course in Grammar prescribed for the High School Examination of 1926, the course in Gram mar for the Intermediate Examination of 1926 shall consist of the following —

The remaining decleusions of all nouns and pronouns, conjugations of the verbs of all the ten classes in all the lakaras, the use of "ix Karal is the four classes of samasis, and krit and taddhita forms"

IL-Arabic and Persian.

Three papers will be set in each of these languages. The first paper will be on the prescribed Text-books and Grammar. The second paper will contain passages for translation into English from the books recommended for rapid reading and from others of equal difficulty. The third paper on Commosition will contain a passage or passages of English Prose to be rend-red into the Classical Language.

(a) Arabic.
Prescribed course:—

(1) Text -Sele tions in Arabic Prose and Verse (Anwar Ahmadi Press, Alfababid),

(u) Grammar—Maba li-nl-Arabia, II Urdu Edition (Minitabai Press, Delhi).

Ripul Reading-Qilyubi-Nawadir-ul-Hikayat (First balfi

Note.-Arabic words must be will ten in the Arabic character

(b) Persian

(1) Text-

بوره Anwar. Sobell إلى إلى إدا الله (in the story of يورك materd of توريدة و ده ، توروسية read of يورك and instead of يورك والله يورك الله ويوسته شده ويات يورك readung from—

ور گفته حبهانگیر از حران وحت 10 دکو سلطعت طیمرالدس محمد ناب حصر بسط حواهده 10 موتمو بالدوله دکر (حوال excluding from بادشاه

Students who offer Persua are required to have such a knowledge of the Etymology of the Arabic language as will enable them to explain all Arabic words and phrases which may occur in the text books and in the books recommended for rapid reading in Persua

hore -Per- 22 words must be was ten in the Persian character

III -LATIN, GREEK AND HEBREW

.There shall be three papers in each of these languages as follows —

Paper 1 -Prepared Books.

Paper 2 - Unseen Passages.

Paper 3 -Grammar and Compo ition.

Puper I shall include pas ages from the prescribed books for translation into Eoglish together with questions relating to subjet-matter and language. Paper 3 shall include (a) questions on Grammar, (b) sentences for translation into the classical language and (c) a continuous passage or pas ages for translation into the classical language.

The papers will be as follows -

Latin

Paper 1.-CICERO In Catilinam, I-IV LIVY, Book xxII, Chapters 1-51,

Virgil, Georgies Books I and IV.

Paper 2 -Unseen Passages

Paper 3 -Grammar and Composition

Greek

Paper 1 —PLATO Apology and Crito SOPHOCLES Antigone Paper 2 —Unseen passages Paper 3 —Grammar and Composition

Hebrew.

Paper 1.- SAMUEL Book I

PRATMS I-LX

Paper 2 - Unseen Passages Genesis is recommended for rapid reading in connection with this paper Paper 3 -Grammar and Composition Duff's Hebrew

Grammar 13 recommende l

HISTORY

There will be two papers in each group A studen may take either A group or B group or both

A -Modern History and Alfied Geography

I -Indian History from 1000 A D

Books recommended -LANF POOLE S Medieval India (Story of Na tions Series) T Fisher Unwin Ld. Shith V A Oxford History of India Oxford Univer

sity Press ROBERTS P E A Historical Geography of the

Logic

There shall be two papers of three hours each the first on Deductive Logic and the second on Injustive Logic

Deductive Logic

The following syllabus is prescribe! —
Definition scopes and value of Logic Nature of
thinking The laws of thought The relation of thought
and language Terms and their classifection. Denotation
and Connotation of terms The predicables Formal
division and definition. Propositions, their import Reduction of statements to legical form. Distribution of
terms Nature and forms of inference. The oppositions
propositions and various forms of education. The syllo
gism its figures and moods. Preduction direct ad indirect
Hypothetical disjunctive and mixed syllogisms. Enthymeme Scrittes and Epi hettern. Function
and value of syllogism. Analysis of deductive arguments.

Inductive Loric

The folloging syllabus is prescribed -

The nature and presuppositions of inductive inference Causation its significance and importance in induction Observation and experiment Classification and nomenclature Hypothesis Imperfect roduction—simple enumeration and analogy Methols of oten life induction Analysis inductive arguments and application of inductive methods. Explanation and establishment of laws. The relation of induction to deduction Fallacies

Books recommended (not prevented) to indicate the standard of treatment of the topics prescribed —
Introductory Textbook of Logic S H. Mellone,

Introductory Text book of Logic S H. Mellone, Blackwood and Son Edinburgh

Intermediate Logic Welton and Monahau, University Tutorial Press, London

Groundwork of Logic Welton, Macmillan and Co

ELEVIENTARY ECONOMICS

Introductory.

Subject matter. Relation to other *cience*. The development of Economic life

Production

Relation between wants and production. The tarrors of production

Land - Natural resources of India Soil and Climate, Sources of Power Raw materials

Labour Density and distribution of population in India Health and vital statistics Occupations

Capital -Buildings and machinery Means of communica ion and transportation in India Irrigation.

Organization—Combination of the factors of production in village industries and in factories. Efficiency of the factors of production in village industries and in factories. Efficiency of the factors of production of Different uses and how efficiency increases. Efficiency of labour increased by education. Division of labour and specialization of machinery. Large scale production and its limitations. Diminishing and increasing return. Development of industrial organization. Its relation to means of transportation. Accompaging changes in rural industries and in agriculture.

Exchange

Utility -- Marginal and total ntility | Law of diminishing utility | Law of demand

Barter - Conditions of barter How both parties gain in utility by exchange

Teachers should also consult --

V. G. Kale.—Indian Economies

Marshall .- Economics of Industry

Chapman - Elementary Economi s.

Jack -Economic Life of a Bengal district

Mann -Lufe and labour in a Deccan village

Practical work.

In view of the fact that many students will leave college to earn their hring after the Intermediate Examination and that many government positions are now being opened to men who have passed this examination, the course should be taught in such a way as to make it of real prictical use to students in after-life. Terchers must be given facilities for taking students out to study small industries markets and conditions of living in both city and [country. The principles should be illustrated from these studies. The examiners are to inspect and mark tha practical work of each student, as follows —

Two family hadgets one of an artisan, one of a cultivator with the student's own deductions.

Two balance sheets, for one nonth or more, of smallscale industries, with suggestions for improvements in the industry (For example, farming, weaving, pottery, carpentry, shoemaking, tuloring, basket making, the gwala, the mithai-wala, etc.)

Diagrams representing the above hudgets and costs of production in the industries as percentages of the total.

. Written work.

Feathers subush' missis on as much written work as possible. The following methods are single 'ed' --

Nore -Teachers should not usually dictate notes, but should require students to white out the rown notes after each fecture from rough notes taken in class and from memory. These notes should be inspected and warted by the teacher. Poetry -- (1) Ramayan Ajodhya Kanda hy Krittibas, edited by Ramanand Chatterjee

> (2) Chaturdashapadi Kahitahali by M Madhusudan Datt, edited by Diuanath Sanyal.

A MODERN EUROPEAN LANGUAGE

(For girls only, in place of a classical language)

There will be three papers of three hours cach. The first paper will consist of extracts from the prescribed Text books together with grammatical questions. The second paper will contain unseen passages for translation from from hinto English these pissages not to be taken from the prescribed Text books. The thirl paper will consist of a passage or passages of English prose to be translated into French.

French

Prescribed lext bools-

EPORMANN CHATRIAN Le Conscrit

DAUDET Tartarin sur les Alpes (Siepmann's Edition)
Le Voyage de Monseiur Perrichon Lahiche et Martin
(Hachette et Cie)

Grammar recomended—French Grammar (Sonnens chien's Parralled Grammar Series)

MATHEMATICS

There will be three papers in Mathematics —One paper in Algebra and Trigonometry a second in plane and Solid Geometry and the elements of Co-ordinate Geometry and a third on Elementary Dynamics

- (1) Algebra Quardratic equations involving two or more unknown quantities the theory of quadratic equations and of expressions of the second degree, imaginary expressions, arithmetical geometrical, and harmonical progressions, permutations and combinations, theory of indices and logarithms proof of binomial theorem for a positive integral index and the n e of hinomial and exponential theorems for any index
- (2) Trigonometry—Including Solution of Triangles, and simple problems of inscribed, circumscribed, and described circles
- (3) Plane Geometry —A more advanced treatment of Theoretical Geometry than is prescribed for the High School Examination, lost proportion and similarity

(4) Geometry of Solids—Elementary properties of lines and planes, surfaces and volumes of parallelopipeds and right prisms pyramids circular cylinders and cones, spheres and spherical segments, frosta of pyramids cones, and spheres, with numerical applications

The use of Trigonometry and Logarithms shall be permitted in solving numerical examples

(5) Co-ordinate Geometry.—The properties of straight lines and circles treated by rectangular and polar coordinates

(6) Dynamics and Statics—Velocity, composition of velocities, relative velocity, acceleration, is tilinear motion ninear uniform acceleration, composition of accelerations, Newton's law of Motion, rectilinear motion under gravity in a vertical and down an inclined plune, motion of two masses connected by a string passing over a pulley, projectiles, direct impact of smooth bodies, definition and calculation of twiction energy, co-p'aint forces, parallel and non-parallel and their composition, equilibrium of a body under three forces, moments, conditions of equilibrium of a body under under asystem of cop laint forces and simple examples, centres of gravity, friction, work and power, simple machines (lever, balance, system of pulleys, wheel and axle, differential wheel and axle)

The following books are suggested in addition to more elementary text-books, School Algebra, H S Hall, Parts I.—III.

School Algebra, Part II, by Paterson (Clarendon Press)

Elementary Algebra, Part II, by P. Ross (Longmuns) Hall and Stevens' School Geometry, Parts V.—VI.

Co-ordinate Geometry, Smith or Loney (Macmilians), Elements of Statics and Dynamics by Loney (Cambridge University Press) Magneti field Lines of force and lines of induction langert A and B po moss of Gans's Deflection and withation Magnetometers. Magnetic moments Earth as a Magnetic determinations | Electrostatic unit of quantity Coulomb's law of force | Electric field, Gold leaf electroscope | Surface density | Po ential Capacity Leyden jar Capacity of a parallel plate condenser | Electrophorus | Wimshurst's machines |

Voltaic cell Electric entrent and its magnetic effects E M unit of current Galvanometers Ammeters Voltameters Ohme law and its verification Unit of resistance and P D Specific resistance, Practical and absolute units Determination of resistance, Wheatstone's bridge P O Boa. Heating effect of current Joule's law Determination of J Electric glow lamp Electric ares Chemical Effect of current Faradays law of Electrical Effects of current Faradays law of Electrolysis Electrochemical equivalent Voltameters Electro-magnetic relations Electro magnet indu tion Induction coil Simple dynamo Motor Electric Telegraph Telephone Microphone Thermopile

The scope of course is approximately indicated by R S Willows A Text hook of Physics (published by Messrs Arnold and Co) and this book is strongly recommended

There will also be an examination in practical work

The laboratory conrects indicated by the anhyoined list of experiment. An account of each experiment must be written by the student in a special note book which will be examined. The account of each experiment should be signed by the Demonstrator, and the books should be kept in his charge.

LIST OF EXPERIMENTS

Mechanics-

Applications of the Triangle of Forces Equilibrium of Paralled Forces Principle of Moments Determination of co-efficient of Friction.

Determination of " g " by the pendulum

General properties of Matter-

Measurements of mass by the balance.

Use of the Spherometer

- " Screw Gauge
- ., Callipers.

Reading the Barometer

Heat -

Testing fixed points of Thermometers,

Determination of Specific Heats,

.. Latent Heats

Construction of a graph illustrating the rate of cooling of a liquid

Verification of Boyle's law.

Determination of the co-efficient of linear expansion,

Light-

Reflection and refraction of light at plane and apherical

Determination of refractive indices

Local lengths of mirrors and lenses.

Sound -

Determination of velocity of sound by resonance.

the frequency of a fork by sonometer

Magnetism-

,,

Mapping out lines of torce by a small magnet

Determination of nentral points in a magnetic field

Comparison of magnetic moments by the magnetometer

Electricity-

Variation of magnetic force at centre of a coil with radius, number of turns and strength of current

Determination of resistance by the use of Wheatstone's wire bridge

Determination of resistance by the use of Ammeter and Voltameter.

Combination of cells in series and parallel

Deta led accounts of the me hod of performing the above experiments will be found in either Willows' Text book of Physics or in any Intermediate conne of practical physics such as Schnitter and Lee

CHEMISTRY

[N B -Candidates will be required to pass in the theorem all part of each Science subject]

There will be two papers and a practical examination

the following syllabus in pre cribed -

The course for the High School Examination with the following addition — Elementary and compound substances mixtures solution chemical action the laws of debutic and multiple proportions, simple methods of the determination of equivalent weights, atoms, molecules, atomic and molecular maghts, vapour density, the atomic theory and Avogudro's hypothesis combination of gases by volume Valency, relation between equivalent and atomic weights.

simple methods of determination of atomic weight. Dulong and Petit's law Boyle's law, Charles' laws vapour pressure, diffusion

Chemical symbols, formulae and equations—calculations of an easy nature

Oudation and reduction

Elementary ideas as to the nature of di sociation in

The outlines of the Periodic law studied from elements prescribed in the course

Preparation and important properties of the following elements and compounds and proofs of the composition of the compounds marked.—

Hydrogen oxygen "water, ozone, hydrogen doxide nitrogen, "the atmosphere the effects of animal and vegetable life npon us composition," ammonia, nitric seid and intrates, nitrous seid and mitrate, "ci rous and "nitric oxides carbon, "carbon dioxide, "carbon monoxid elementary ideas about combination and structure or farme coal gas, chlorine, "hydrochloric acid, the chlorides, chloric acid and chlorates bromine, rodine, their brdraerd and salts

Sulphur, *hydrogen sulphide, sulphur *dioxide and trioxide sulphuric acid and the sulphites, sulphirous acid and sulphites

Phosphorous, hydrogen phosphole, phosphorous trivoide and peathoxide, orthophosphorie acid

Silica, silicates of Na, K and Ca, glass

Sodium potassium, their bydroxides, chlorides, nitrates, carhonates, sulphites

Calcium etrontium, harium and their oxides, carbonates, sulphates, chlorides, mitrates

Magnesium, ite oxide, chloride, sulphato, cari onate and nitrate Zinc, its oxide, chloride, sulphate and carbonate.

Lead, ite chloride, sulphate and nitrate.

Copper, the outlines of its metallurgy, ite oxides, chlorides sulphate and nitrate

Iron, the outlines of its metallingy, its oxides FeO, Fe₂O₄, Fe₂O₄ oblorides and sulphates

Organic -

A —The preparation, typical properties and structural relationship of the following compounds —

Methane, ethane, ethylene chloroform, todoform

Methyl alcohol and ethyl alcohol,

Formaldehyde and acetaldehyde.

Formic acid and acetic acid.

Ethyl acetate and methyl acetate

Acetamide, acetyl chloride, acetic anbydride

Methylamine

B—The descripture properties of the following — Acctylene, glycerol, acctone, ether, oralic acid, tartaric acid, fats, sease (and asponification) starch, cane sugar, grape sugar (and fermentation), urea, henzene, whenol, auline, benzone acid,

PRACTICAL WORK

Students will be examined in Practical Chemistry

Students are expected to perform the following experiments in the laboratory. An account of each experiment must be written by the student in a special note book, which will be liable to examination by the examiner. This note-book should be k pt. in the charge of the laboratory instructor and each account of an experiment should be signed by him. The Principal of a College will be responsible for the production of this note book, when demanded by the proper authorities.

The practical course is as follows -

- 1 Su h practical work as is required for the High School Examination
 - 2 Qualitative analysis of simple salts
- 3 Pr paration and purification of simple salts involving no special difficulty
- 4 Simple gravimetric and volumetric estimations such as estimation of alkali acids and alkaline carbonates by titration gravimetric estimation of iron and simple gravimetric experiments such as change in mass on oxidation of magnetium etc.
- 5 Determination of melting and boiling points fractional distillation
- 6 Qualitative detection of hydrogen mitrogen sulphir and halogens in organi compounds

Books suggested -

- SHENSTONE Inorgame Chemistry Arnold)
 ROSCON and LOVE Elementry Inorgame Chemistry
 ROSCON and HARDEN Inorgame Chemistry for Advanced Students
 - A Class book of Organic Chemistry, by J B Cohen O ganic Chemistry Part I by Perkin and Kipping
 - Domogton's Class book of Chemistry Parts 1-4

BIOLOGY.

I -Zoology.

[NB - Candidates will be required to pass in the theoretical part of each Science subject]

- A—Living and non-living matter. The distinctive properties of living matter or protoplasm and its chemical composition. The structure and life history of Amoeba and malaria parasite as examples of the Protozoa. A general conception of the structure and phenomena of the animal cell, direct and indirect cell division. The union of cells to form tissues and the combination of tissues to form organs.
- B The structure of Hydra as an example of the Metazoa. The principle of the physiological division of labour and the correlated differentiation of structure.
- C -The structure and bionomics of an Indian earthworm as an example of a segmented animal.
- D-The structure of the cockroach as a type of Arthropoda Metamorphosis among insects as illustrated by the life history of the common mosquito
 - E The general characters of the Chordata
- F The general anatomy, listology and plysiology of the various systems or organs in the frog
- G—An elementary kroaledge of the enatomy and osteology of the rabbit or other common mammal. The brain and eye if the sheep and the skull of the dog may be substituted for those of the rabbit.
- $\mathbf{H} \mathbf{A}$ general classification of the animal lingdom with the characteristics of the priocipal phyla
- J—Reproduction, sexual and asexual, ova and spermatozoa, oogeness and spermatogeness. The elementary facts of the fertilisation and segmentation of the orum, the outlines of the development and larval history of the frog, the three primary germ layers as d the organs derived from them

II _ Butany.

- [A B -- Candidates will be required to pa_{2^m} in the theoretical part of each Science subject.]
- A —The structure and germination of seeds, the morphology of the root, stem and leaf. The chief types of floral structures The chief types of inflorescence and the common types of fraits
- B.—The parts of a typical vegetable cell, the cell contents and their microchemical reactions, the division of a cell, the chief types of plan. tissues A comparative study of the internal structure of the root, atom and leaf of the Augiosperms The structure of the reproductive organs of the Angiosperms.
- C. -The structure of Bacillus subtilis and the modes of natrition among the Bacteria
- D -The structure, physiology and life-histories of Ulothrix, Spirogyra, Mucor, and yeast
- E.—The structure and life-histories of a moss and a fern, and the phenomenon of alternation of generations

F .- The life-lustory of Angiosperms

- G-An outline of the classification of the vegetable kingdom to illustrate grades of structure and method of reproduction
- H Elementary plant physiology, stability of the plant body, the Banal constituents of plant food, assimilation, transpiration, respiration, the main facts about growth, the chief types of movements

PRACTICAL WORK

Students are expected to keep a record of all practical work in a special laboratory sketch book which will be liable to examination by the examiners. The laboratory instructors should sign the result of each day's practical work

A .-The microscopical study of Amoeba and Hydra, the study of flydra by means of transverse and longitudinal sections The general dissection of the earthworm cockroach, and frog, life-history of mosquito, a microscopical study of the chief animal tissnes from fresh or prepared preparations of muscle, nerve, cartilage, bone, blood, and connective tissue, the microscopical study of the earthworm by means of fresh preparations and transverse sections, a microscopical examination of the kidney, liver, spinal cord, stomach, ovary, and tistis of the frog. The skeleton of the frog

The osteology of the rabbit substituting the skull of the dog for that of the rabbit, and the dissection of the allogation vascular, and reproductive systems of that animal

E.—The dissection of plants and parts of plants, the preparation, simple staining, and study of microscopical sections of plants A practical study by microscopical examination and otherwise of besteria, years, Springyra Ulothrix, Micco, n moss, a fern, and the vegetative and reproductive organs of Angiosperms treated in an elementary manner.

The description of a flowering plant and its parts in semi-technical language.

(Where fresh material cannot be obtained, recourse should be had to prepared specimens)

Text books suggested -

PARKER and BRATIA Elementary Course of Practical Zoology (Macmillan)

HOLMES: Biology of the Frog.

MARSHALI and HURST Practical Zoology. (Murray)

RANGACHABI: Botany for Indian Schools, 2nd Edition (Government Press, Madras.)

GAGER Fundamentals of Botany (Blakiston.)

COMMERCIAL DIPLOMA EXAMINATION OF 1926

The following are the subjects of examination —

- 1 English including corresponden e
- 2 Book keeping and Accountance
- 3. Business Methods and Elementary Economics
 Optional subjects—

One of the following -

- 1 C mmercial Gengraphy-
 - (a) General
 - (b) India
- Or Typewriting
- Shorthand

The following papers will be set -

- 1 English including correspondence Two papers of
 - 2 Book keeping and Accountancy -Two papers of
- 3 Burness Methods and Elementary Economics Two papers of three hours each one paper on business methods and one paper on Elementary Economics
- 4 Commercial Geography One general paper of three hours One paper on the Commercial Geography of India of three hours
 - 5 Typewrifing -One paper of three honra
 - 6 Shorthand -One paper of three hours

The syllabns in each subject is as follows -

English including correspondence—1 Drafting of commercial and official correspondence with special attention to grammar, syntax, punctuation and use of commercial terms and vecabilities.

9 Essay writing and composition with practice in expansion of summarized ideas into full statements and vice versa.

- 3 Reading daily nowspapers with practice in editorial writing and nowspaper articles especially on commercial topics. Ability to understand the financial and business section of the newspapers.
 - 4 Precis writing

NOTE —It is suggested that papers in this subject may follow the lines given below

First Paper-Commercial English-

This will consist of-

- (a) Draft of commercial and official correspondence
- (b) The writing of a short article to in licate an intel ligent l nowledge of commercial terms
- (c) Précis writing

Second Paper - General English -

This will consist of-

- (a) Translation from indirect to direct spe ch and
- vice versa
 (b) Re writing of incorrect or badly constructed sunt
- (c) Synthesis of simple sentences and the re-olution of complex sentences
 - (d) An eseay on a subject of general inter st

Book keeping and Accountancy—The principles of Double Entry Book-keeping and their application Books of original entry including Tabular Forms The Ledger I rial Balance Frading Manufacturing and Profit and Loss Accounts with apportionments and adjustments Balance-sheets Loose Leaf and Card Index sy tem of Book keeping Self Balancing Ledgers Single Entry Book keeping

In the treatment of the above the following matters will be included — Cheques, Pills of Exchange and Promissory Notes, Good will Classification of Assets, Bad dobts, Depreciation Reserves and Sinling Funds, Consignment Joint Venture and Contract Accounts Partnership and Company Accounts (including the Double Account system), Capital and Revenue, Investments, Accounts Current and Average Due Dies

Business methods—1. The general rontine of a Business House:-Inward and Outward correspondence (excluding drafting), Methods of rapid communications, Duplicating processes

- 2. The significanc of Trade, Commerce and Industry, Manifacturing and Distribution House The brying and selling of goods Mercantile Enquiry Agencies. Importation and Exportation of goods Documentary Bills Elementary Fire and Marine Insurance as applicable to this section. Use of Card Indexes
- 3 The meaning of the principal commercial terms occurring in connection with the above and the preparation of the chief do-aments survived including arithmetical calculations
- 4 An elementary knowledge of the Indian Law of Contracts, Indian Negotiable Instruments Act and the Indian Registration Act

Elementary Economics —(The treatment of the subject should be very elementary and as far as possible at should be illustrated by reference to Indian conditions)

The subject matter and scope of economics, fundamental notions and simple definitions. Relation between wants offerts and subjection.

Production.—Factors of production Land, Labour, Capital and Organization

Nature and Limitations of land, Division of labour and other factors of efficiency of labour, Organization of capital.

Laws of increasing, diminishing and constant returns Wants—Diminishing ntility Value—its determina-

tion Balancing of supply and demand

Machinery of Exchange—Money and its functions Quilties most desirable in currency—legal tender—token money—Gresham's Lav—Paper Currency—Convertible and Inconvertible credit—Credit instruments—Bills of Erchange—Cheones Indian Chreency—The Gold Exchange Standard—The Gold Sundard Reserve, Conneul Bells—Reverse councils—Indian Currency during and since the war—Indian Banks and the chief functions performed by them—the Imperial Bank, the Exchange Banas and Indian Joint Stock Banks,

Distribution - Rent - interest - wages - profits (with particular reference to Indian conditions)

Books recommended -

PENSON Economics of Every Day Life, Part I

Moreland Introduction to Economics.

JEVONS Money and Banking in India

Gommercal Geography — A. General, — I (a) Physicographic Control of Commerce, Climate Effect of climate on vegetation Vegetation regions Distribution of important commodities as wheat, rice, cotton, barley, flaz, jute, etc., and conditions under which they are severally produced

(b) Vegetation, its relation to industries

(c) Trade routes connecting the most important regions producing the different commodities as studied above and the important markets for them Ports, Localisation of Industries.

II A study of the various typ s of geographical regions from the standpoint of commerce, particularly of the West marginal type in Europe, the East marginal type in Monsoonal Asia, and of continental types in N America

(This would imply an intelligent study of the physical features of the different regions, more particularly in relation to their effects on chimate, agreeultural preduction, and the casiest lines of inland communication, whether by water, road or rail Special attention should be paid to the reographical distribution of industries)

- B. India -A stody of the Commercial Geography of India on the regional has a involving the study of -
 - (a) Surface features and physical structure
 - (c) Agricultural products
 - (h) Climate (d) Irrigation
 - (e) Distribution of minerals
 - (f) Industries
 - (a) Commoni ations

Norm In the study of regional types special attent on may bedevoted to the parts of the British Emp re occurring in he atype

TYPE WRITING

This will be the same as for the High School Examina tion but of a more advanced character-the appeal to be-30 words per migute

SHOPTHAND

- Witting in shorthard from a passage dictated at the rate of 80 words a minute for a period of ten minutes
 - Writing in shorthand from a bosiness letter of
- general commercial phraseology dictated at the rate of 80 words a minute for a period of 5 minutes
 - 3 Transcription of both the above

APPENDIX A

Dates of the High School Intermediate and Commercial Diploma Examinations of 1925

In 1925—The High School the Intermediate and the Commercial Diploma Examinations will commence on the 13th March 1925

APPENDIX R

Byelaws of the Board framed under section 20 of the Intermediate Education Act. 1921

- At all meetings of the Board, a ven members incinsive of the Chairman shall form a quorum.
- 2. If a quorum is not present thirty minutes after the
- adverted time of the meeting there shall be no meeting
- If, in the course of a meeting any mumber calls attention to the absence of a quorum the Chairman shall discolve the meeting.
- Every question shall be decided by a majority of the votes of t e members present. In the case of the votes bring equally divided the Chairman shall have a second vote
- 5 If a member continuously disremands or questions any order or ruling of the Chairman made at a meeting of the Board, the Chairman may take the vote of the meeting as to whether such member shall not be suspended for that day. If the members present de ide onon snapens n the Chairman shall de-lare the offending member suspended, and and member abill to bound immediately to withdraw
- 6 No motion which has been negatived by the Board shall be again brought forward, except with the permission of the Chairman, within one year from the date upon which it was negatived.
- All meetings of the Board shall be presid d over by the ex-office Chairman of the B at l. In the absence of the Chairman, the members present shall elect a Chairman.
- 8. Meetings of the Board and of its Committees shall, unless for special reasons the Chairman otherwise directs. he hold at Allahahad
- 9 The election of co-opted mem sers of the Board shall 're'neih ar tac 'Ananai Siee rag or the bourd.
 - 10. Notice in writing of meetings of the Board shall he despatched to all members of the Board not less than thre week before the meeting, together with the agenda paper for the meeting

- 11 No business other than that contained in the agenda paper shall be transacted at a meeting unless with the consent of the Chairman
- 12. Notice of a motion or resolution to be moved at a musting of the Board must be in the hands of the Secretary not less than 10 days before the meeting
- 13 All questions as to whether proper notice of a motion has been given shall be decided by the Chairman, whose decision shall be final.
- 14 (a) No motion or resolution of which due notice has not been given may be moved at a meeting of the Board, except—
 - (1) to adjourn a debate,
 - (2) to adjourn the meeting,
 - (3) to dissolve the meeting,
 - (4) to change the order of business,
 - (5) to refer any matter to any authority of the department or the University or the Government
 - (6) to pass to the next stem of husiness.
 - (7) to appoint a committee,
 - (8) to resolve the meeting into a Committee,
 - (9) to propose that the question be now put
- (b) A motion under (1), (2), (6) or (9) shove shall he put to the vote without discussion.
- (c) Motions under (1), (2), (3), (4), (6), (8), and (9) shall only be moved with the previous consent of the Chairman
- 15 Every motion shall be affirmative to form and shall begto with the word "that"
- 16 Every motion must be accorded, otherwise it shall drop. The seconder of a motion may reserve his speech with the permission of the Chairman.
- 17 When a motion that is in order has been seconded, it shall be stated from the Chair, before it is discussed
- 18 If no member rises to speak to the motion after it has been stated from the Chair, the Chairman shall proceed to put the question to the vote.

by it.

- 19. Not more than one motion and one amendment thereto shall be placed before the meeting at the same time.
- 20 A motion once disposed of shall not be again brought forward at the same meeting, or at any adjourn ment thereof
- 21. No amendment shall be proposed which would in effect constitute a direct negative to the original motion.
- 22 . Every amendment must b_{τ_0} relevant to the motion upon which it is moved
- 23 No amendment shall be proposed which substan tirely raises a question already disposed of by the meeting or which is inconsistent with any resolution already pas ed
- 24 The order in which amendments that are in order are to be taken up shall be determined by the Chairman
- 25 An amendment must be seconded in the same way as a motion, otherwise it shall drop. A seconder of an inmendment may reserve his speech with the permission of the Chairman.
- 26 When an amendment that is in order has been moved and seconded, it shall be stated from the Chair
- 27. The mover of a motion for dissolution or adjournment has no right of reply
- 23 When the Chairman has accreained that no other member entitled to address the meeting desires to speak, the mover of the original resolution may reply upon the whole desire
- 29 . No member shall speak to the question after the mover has entered on his reply
- 30 When the debate is concluded, the Chairman shall, after summing up, if he so desires, put the question to the vote thus
 - If there is an amendment the Chairman shall state the motion and the amendment and take the vote of the meeting

- (2) If the amendment is negative the original motion shall be again stated from the Coair, and subject to the foregoing regulations any other amendment which is in or let may then be propored thereto.
- (3) If an amendment is carried the motion as amended shall be stated from the Chair and may then be dehated as a substitute question to which any further amendments to the original motion which are in order, so far as they shall be applicable may be proposed subject to the foregoing regulations. Such further amendments shall be disposed of in the same manner as the original amendment. When all the amendments have be in this dealt with the Chairman shall take the voto of the meeting on the motion as amended as the substantive recolution.
- 3 Am tion for dissolution or adjournment may be movel at any time as a distinct question but not as an amendment, nor so as to interrupt a speech
- 32 If a motion for dis olution is carried, the business before the meeting shall drop
- 33 If a motion for adjournment is carried the meeting shall be adjourned and the business shall be resumed at the adjourned meeting
- 34 A motion for the adjournment of a de'ate to some specific late and hour may be moved in the like manner, and if it be cirred thall have the effect of postponing the debate on the question under consideration till the date and hour specified and the other mems on the agenda pap r shall be proveded with If the motion be negative! the debate shall be resumed
- 35 A meeting or a debate renewed or continued after an adjournment is to be deemed one with that preceding the adjournment

- 36 A motion to pass to the next item of business may he mad, at any time in like manner and subject to the same rules as one for adjointment. If such motion be carried the motion under consideration and the amendment thereon if any shall drop
- 3 At any time after a motion or amendment has been made a member may request the Chairman to put the question and firt repersits the Chairman that the motion has been sufficiently discussed he may close the discussion by calling upon the mover for his reply and may then put the question to the v e.
- 38 No member shall peak for more than fifteen minites when proposing a notion or amendment or for more than ten minites when econding or speaking to a motion or am adment or when replying
- 39 The Chairman may at any stage in the proceedings at his own discretion or at the r quest of a member explain the scope and effect of the motion or amendment which is before the meeting. He may also at the conclusion of a debute sim nothe labate if he so desires
 - 40 Any member may with the permiss n of the Chairman rise even while another is speaking o explain any expression used by himself which may have been misunderstood by the speaker hat he ball confine himself strictly to such explanation
 - 41 Acy member may call the Churman's attention to a point of order even while another member is addressing the meeting but no speech shall be made on such point of order
- 42 The Chairmon shall be the sole judge in any point of order, and may call any member to order and may if necessary, dissolve the meeting or adjourn it to some fiour on the same or the following day
- 43 A motion or amendment may be withdrawn by permission of the Chairman by any member who has given notice of such motion or amendment.

- 44 Any motion or amendment standing in the name of a member who is absent from a meeting may be b ought forward by any other member
- 45 On putting any question to the vote, the Chairman shall call for an indirection of the opinion of the Board by a show of hands in the affirmative and negative and shall declare the result thereof recording to bis opinion
- 46 A motion for the appointment of a Committee on a subject under debate may be made by any member at any time and without previous notice
- 47 A motion for the appointment of a Committee must define the purpose for which the Committee is to serve and the number of members to compose it Amendments for ealinging or restricting the number may be made without previous notice. If the motion is carried, the member moving shall name the persons whom he walkes to form the Committee. A ballot shall then be taken if necessary and the requisite number appointed from there who obtain the largest number of yours.
- 48 The Convener of a Committee shall be appointed at the time of the appointment of the Committee
- 49 The resolutions of a Committee appointed by the Board shall be embodied in a report. The report shall be presented to the Board at its next meeting subject to due notice.
- 50 Notice of meetings of Committees may be sent to members by the Conveners through the Secretary or direct, but in the latter case a copy of the notice must invariably be sent to the Secretary
- 51 Meetings of all ordinary Committees of the Board shall, as far as possible be held immediately before the meetings of the Board
- 52 The Convenor of a Commuttee shall furnish to the Secretary a copy of the report of every meeting of the Committe together with a list of the members present
- 53 The quorum of a Committee shall for be less than a majority of the members constituting it

54 If the meeting of a Committee fails for want of a quorum, the meeting may be adjusted to some other date when the members present will even in the absence of a quorum transact the business nutfied for the original meeting. The buliness of a meeting which fails for want of a

norum may also be transacted by correspondence

5 Committees of Courses may di post of their busi
ness par ly by meeting and partly by c rrespondence

56 At meetings of Committees of the Board every question shall be decided by a majority of the votes of the members present. In the case of the vote hong equally divided the person presiding shall have a sec nd vote

members present in the case of the vote naing equally divided the person presiding shall have a sec nd vote 57 As soon as practicable after meeting of the Board a draft of the minutes of such acceting shall be

shmitted by the Secretary to the Chairman and attested by him. The minutes shall then be printed and circulated to all members and such of them as were present shall, within a fortinght of the 1 sine of the minutes communicate to the Secretary any exceptions they may take to the correo in as thereof. The minutes and the exceptions taken, if any shall be laid before the next meeting of the Board, and the minutes in their final form shall then be confirmed. 58 In any case not provided for hy these hy-claws the

58 In any case not provided for hy these hy-laws the Chairman shall be cuts led to give his own rilling as to procedure
